# ONTARIO SECURITIES COMMISSION

FOR

January, 1979

Issued Monthly by the
ONTARIO SECURITIES COMMISSION

10 WELLESLEY STREET EAST, TORONTO, ONTARIO M7A 2H7

### **EXPLANATORY NOTES**

Information contained in this report has been summarized from reports filed with the Commission.

The name of the issuer is followed by a brief description of the class of security the name of the person or company reporting and his or its relationship to the issuer. If a person has an indirect interest in the securities reported, e.g., through holding companies, affiliate companies, partnerships, trusts or other entities, this is shown. Symbols are used in the column "Transaction and Ownership Symbol" to indicate the nature of ownership i.e., direct or indirect. Similarly the character of transactions is indicated provided the transactions are other than a purchase or sale. (See guide to symbols below):

### **GUIDE TO SYMBOLS**

RELATIONSHIP	(appearing after the name reported)
"В"	-Beneficial Owner (direct or indirect) of equity shares of a corporation carrying more than 10% of the voting rights attached to all equity shares of the corporation outstanding.
"D"	—Director of principal company.
"DI"	—Director of a company which is an insider of the principal company.
"K"	-Exercises control or direction (direct or indirect) of equity shares of a corporation carrying more than 10% of the voting rights attached to all equity shares of the corporation outstanding.
"S"	—Senior Officer of principal company.
"SI"	—Senior Officer of a company which is an insider of the principal company.

### NATURE OF OWNERSHIP

No symbol —Securities are beneficially owned directly.

Symbol #1 —The reporting person or company beneficially owns and/or has control or direction over securities which are held by a company, associate, partnership, trust or other entity.

### CHARACTER OF TRANSACTION

No symbol	—purchase or sale	"M"	—internal transfer
"A"	—bequest or inheritance	"Q"	—qualifying share
"C"	—compensation	"R"	-redeemed (called, Matured)
"E"	-exchange or conversion	"Т"	-stock dividend
"F"	—exercise of rights, etc.	V	-stock split
"G"	—gift	X	-exercise of option
"IR"	—initial report	"Z"	-distribution

<sup>\*</sup>Returned for reconciliation purposes.

December 28, 1978

### NEWS RELEASE

The Ontario Securities Commission today announced that Robert Steen will succeed T.O.P. Brown as Deputy Director, Filings and that John Leybourne will succeed James DaCosta as Deputy Director, Enforcement. Both appointments take effect at the year end.

Mr. Steen, 38, will be the branch head responsible for review of prospectuses, applications and other material requiring review by the Commission. In this position, he will have a significant influence in guiding the formulation of new policy initiatives taken by the Commission and in reviewing compliance with The Securities Act, regulations and policies. Mr. Steen, who holds degrees as M.B.A. and C.F.A., joined the prospectus filing staff in 1976; he had previously been an investment analyst with securities firms and a financial consultant to another branch of the Ontario government. He succeeds Mr. Brown, who is retiring after 23 years of outstanding service with the Commission, including 11 years as Deputy Director, Filings.

Mr. Leybourne, 51, will be the branch head responsible for enforcement of the securities laws, including investigations of allegations that contraventions have occurred. His staff of investigators, accountants and lawyers maintains close liaison with police departments and other enforcement agencies in Canada and elsewhere. Mr. Leybourne joined the Commission in 1975 after 32 years service with the Metropolitan Toronto Police Force, including 15 years as a staff sergeant. He was appointed Chief Investigator in April, 1978; his promotion to Deputy Director, Enforcement makes him the first non-lawyer to hold that position. He succeeds James DaCosta, who has elected to return to the private sector after three years with the Commission.

James Baillie, Commission Chairman, commented: "I am delighted that we have been able to fill these two important positions with highly qualified persons already on the staff of the Commission. This reinforces my confidence in the quality of the Commission's personnel. We will miss Mr. Brown and Mr. DaCosta, but I am confident that their successors will live up to the high standards that they have set."

### **Notice**

### AMENDMENT TO

### NATIONAL POLICY NUMBER 1

### CLEARANCE OF NATIONAL ISSUES

To facilitate the acceptance of a prospectus in more than one province and to provide for uniformity of administration, the securities regulatory authorities ("the administrators") for the Provinces of Alberta, British Columbia, Manitoba, New Brunswick, Ontario, Prince Edward Island, Quebec and Saskatchewan\* have agreed upon the procedure which may be followed by an underwriter or an issuer wishing to clear a prospectus in more than one province.

### This procedure is as follows:-

- 1. The preliminary prospectus must be filed contemporaneously with the administrator in each of the provinces in which it is proposed to distribute the issue.
- 2. The "principal jurisdiction" will normally be selected by the party making the filing. The selected province may or may not agree to accept. The party making the filing shall advise each of the provinces in which the preliminary prospectus is filed of the names of the "principal jurisdiction" and each of the other provinces in which it is proposed to distribute the issue.
- The securities administrator in the "principal jurisdiction" in which it is sought to clear the issue will assume responsibility on behalf of each of the other provincial administrators for clearing deficiencies with the party making the filing.
- \* The Provinces of Newfoundland and Nova Scotia were not represented at this special conference and are being consulted as to their participation.

- 4. Upon receipt of the filing the administrator of the "principal jurisdiction" will review the material and issue the initial deficiency letter within ten working days. Copies of the deficiencies will be sent immediately to each of the other provincial administrators involved, by teletype or telegraph, as well as to the party making the filing.
- 5. Within five working days of the receipt of the initial deficiency letter, the other administrators will furnish the administrator in the "principal jurisdiction" with any additional comments they may have. These will also be forwarded by teletype or telegraph.
- on the basis of this additional information, the administrator in the "principal jurisdiction" may then forward a second deficiency letter. In the event that he receives no comment from the other administrators within this additional five working day period, it will be assumed that there are no other deficiencies.
- 7. When other administrators have suggested deficiencies, other than those suggested by the "principal jurisdiction", subject to paragraph 8 the administrator in the "principal jurisdiction" will undertake to report back to those administrators the changes which have been agreed to or otherwise as a result of their requests.
- 8. Where, after consultation with the jurisdiction originating the new deficiency, the "principal jurisdiction" concludes that the deficiency is one which can be most effectively dealt with

by the originating jurisdiction, it shall advise that jurisdiction and instruct the party filing to deal directly with that jurisdiction. The "originating jurisdiction" will advise the "principal jurisdiction" as to any changes agreed to or otherwise.

- When the administrator in the "principal 9. jurisdiction" is satisfied that the deficiencies have been cleared and has received a signed prospectus in an acceptable form, he will then advise the other jurisdictions immediately by telegraph or teletype of his intention to accept the prospectus for filing. The other jurisdictions will then respond by advising him as to the acceptability or otherwise of that prospectus, subject, in the affirmative, to their receiving signed final material. The administrator in the "principal jurisdiction" will then advise the party making the filing.
- 10. The signed final material shall be filed, so near as may be, contemporaneously in each of the other jurisdictions. The other provincial administrators will then be in a position to accept or refuse the filing.
- 11. It must be clearly understood that this procedure is being adopted on a trial basis for the convenience of the investment community. It involves no surrender of jurisdiction by any provincial regulatory authority. Each of the administrators will retain in its entirety the statutory discretion vested in him to review, accept or reject a particular prospectus, subject to the terms and conditions which are normal to that jurisdiction.

### NATIONAL POLICY NO.15 (REVISED)

# CONDITIONS PRECEDENT TO ACCEPTANCE OF SCHOLARSHIP OR EDUCATIONAL PLAN PROSPECTUSES

The sale of contracts or plans commonly referred to as "university scholarship plans" or "scholarship agreements" must be subject to the following conditions before the prospectus will be acceptable for filing:

- 1. A very clear distinction must be drawn between the "foundation" (which is described as a body without any profit motive or desire for pecuniary gain) and the distributor (the registered distribution agency who sell the plan under a commission arrangement often described as an "enrolment fee") in order that the public will not be induced into the error of believing that there are no sales charges or other commissions.
- 2. The scholarship plan distributors and salesmen, of course, must hold registration under the specific provincial acts. The use of such expressions as "education counsellors", "scholarship counsellors or advisers", "enrolment counsellors" is viewed as misleading and should not be used.
- The funds received from the subscribers must be deposited with a Canadian chartered bank or a provincially licensed trust company or other similar financial institution whose accounts are normally insured by the Canada Deposit Insurance Corporation or La Régie de l'assurance-dépôts du Québec. Where a subscriber's

account is not afforded the protection of insurance by the Canada Deposit Insurance Corporation or La Régie de l'assurance-dépôts du Québec, the fund administrator must ensure that such subscriber's account is considered to be assets under administration in the hands of the depository.

- 4. The fund administrator, which is usually the "foundation", will secure the best interest rate possible on the deposits, and the interest paid on the subscriber's capital shall be transferred to a trust fund held by the same depository which in turn will be administered for the benefit of the beneficiaries of the plans. In securing the best interest rate possible the fund administrator may, where not contrary to the scholarship agreement, cause the subscriber's deposits to be invested in mortgages provided that such mortgages are:
  - (a) first mortgages on residential properties of 8 units or less located in Canada and having a maturity not exceeding 5 years;
  - (b) an amount which is not more than 75% of the fair market value of the property securing the mortgage, except when:
    - i) such mortgage is insured under the National Housing Act (Canada) or any similar act of a province; or
    - ii) the excess over 75% is insured by an insurance company registered or licensed under the Canadian and British Insurance Companies Act (Canada), the foreign Insurance Companies Act (Canada) or insurance acts or similar acts of a Canadian province or territory;

- (c) acquired from a lending institution with which the fund, the administrator of the fund, the trustee(s) and the distributor of the fund are dealing at arm's length;
- (d) purchased and sold at fair market value, i.e. that principal amount which produces at least the yield prevailing for the sale of comparable fully serviced mortgages as established by major mortgage lenders under similar conditions;
- (e) fully funded, serviced and not in arrears at the date of acquisition;
- (f) not on a property in which:
  - i) the administrator, the trustee or the distributor of the fund or any senior officer or director thereof, or
  - ii) any person or company who
     is a substantial securityholder of the administrator,
     a trustee or the distributor
     of the fund, or
  - iii) any associate or affiliate of
     persons or institutions men tioned in subparagraphs (i)
     and (ii),

has an interest as mortgagor or as an associate of a mortgagor;

(g) limited in amount, in respect of any one mortgage to \$75,000;

- (h) restricted in total to an amount not greater than 75% of
  - i) funds arising from new contracts sold to subscribers pursuant to a prospectus which contains disclosure of the arrangements in respect of mortgage investment and which has been accepted for filing by the Administrator; and
  - ii) funds held on behalf of subscribers who, after receipt of an information circular which has first been filed with and accepted by the Administrator, have agreed in writing to permit their plan contracts to be included in the mortgage investment arrangement;
- (i) on properties appraised by a qualified appraiser such as a bank, trust company, loan company or insurance company, or other person or company which makes appraisals and whose opinions are relied upon in connection with lending or servicing activities, and who in the judgment of the management company or trustee of the specific fund is properly qualified to make such a determination.
- (j) not on raw land or undeveloped land.
- 5. The depository must maintain an accounting system which will permit it to determine the total amount of deposits made by each subscriber, all deductions from such deposits and the amount of interest produced by the deposits of each subscriber.

- 6. The trust funds shall be administered pursuant to a trust indenture or deed in accordance with the terms detailed in the prospectus, and must contain a provision under which a licensed trust company agrees to act in the place of the foundation in the event that the foundation refuses to or is unable to act.
- 7. The fees charged, including the commissions of the distributor and its salesmen, must not exceed \$200, per plan. The first \$100, paid under the plan may be applied against this fee and the balance may be deducted at a maximum rate of 50% of each of the further contributions.
- 8. From these fees sufficient funds must be set aside in trust to pay the future costs of administering the trusts established under 6. These funds shall not be used directly or indirectly for any other purpose. The costs of distribution must be borne fully by the distribution company. Any additional sums rebated or otherwise paid by the depository to assist in the payment of the charges for administration of the funds shall be held in trust by the foundation solely for this purpose and shall not be paid directly or indirectly for any other purpose.
- 9. The plan must grant the subscriber the right to withdraw from the plan without any cost to the subscriber within 60 days from the execution of the contract.
- 10. Where the subscriber wishes to withdraw from a plan after 60 days from the date of the execution of the contract, the subscriber shall not be obliged to pay any fees in addition to those already paid, but may lose the total amount of fees paid to that point.

- 11. It is considered contrary to the public interest to accept for filing a scholarship plan which calls for the complete forfeiture of the capital and accumulated interest in cases where the plan is abandoned before its maturity. The same shall apply to so-called "special" plans which consist of the simple deposit by the subscriber of an amount equivalent to the interest, without any right to reimbursement.
- 12. The schedule of instalment payments must be equitable for all children enrolled. In the setting of the schedules, accounts must be kept of the age of the children and the number of instalments foreseen so that there is an actuarial equivalent between the instalments foreseen for each age and each plan. Accordingly the so-called "family plans" are not acceptable.
- 13. All beneficiaries must participate equally in the advantages of the plan. The foundation or trustee must make provision in the trust indenture for the payment of equivalent scholarships for each of the eligible participants.
- 14. Scholarship plan agreements must be filed with the preliminary prospectus (or prospectus as the case may be) as part of the supporting material together with a copy of the trust agreement.
- 15. The prospectus shall clearly indicate on its front page the speculative nature of the scholarship plans and the real cost of participation in the plan to the subscriber.

## ONTARIO SECURITIES COMMISSION

**FOR** 

February, 1979

Issued Monthly by the
ONTARIO SECURITIES COMMISSION

10 WELLESLEY STREET EAST, TORONTO, ONTARIO M7A 2H7

### **EXPLANATORY NOTES**

Information contained in this report has been summarized from reports filed with the Commission.

The name of the issuer is followed by a brief description of the class of security \*he name of the person or company reporting and his or its relationship to the issuer. If a person has an indirect interest in the securities reported, e.g., through holding companies, affiliate companies, partnerships, trusts or other entities, this is shown. Symbols are used in the column "Transaction and Ownership Symbol" to indicate the nature of ownership i.e., direct or indirect. Similarly the character of transactions is indicated provided the transactions are other than a purchase or sale. (See guide to symbols below):

### **GUIDE TO SYMBOLS**

RELATIONSHIP	(appearing after the name reported)
"B"	—Beneficial Owner (direct or indirect) of equity shares of a corporation carrying more than 10% of the voting rights attached to all equity shares of the corporation outstanding.
"D"	—Director of principal company.
"DI"	—Director of a company which is an insider of the principal company.
"K"	—Exercises control or direction (direct or indirect) of equity shares of a corporation carrying more than 10% of the voting rights attached to all equity shares of the corporation outstanding.
"S"	—Senior Officer of principal company.
"SI.,	—Senior Officer of a company which is an insider of the principal company.

### NATURE OF OWNERSHIP

No symbol —Securities are beneficially owned directly.

Symbol #1 —The reporting person or company beneficially owns and/or has control or direction over securities which are held by a company, associate, partnership, trust or other entity.

### CHARACTER OF TRANSACTION

No symbol	—purchase or sale	"M"	—internal transfer
"A"	—bequest or inheritance	"Q"	—qualifying share
"C"	—compensation	"R"	-redeemed (called, Matured)
"E"	exchange or conversion	"Т"	-stock dividend
"F"	—exercise of rights, etc.	V	—stock split
"G"	—gift	"X"	-exercise of option
"IR"	—initial report	"Z"	—distribution

<sup>\*</sup>Returned for reconciliation purposes.

### Notice

### DRAFT REGULATIONS UNDER THE COMMODITY FUTURES ACT, 1978

On November 9, 1978 draft regulations under The Commodity Futures Act, 1978 were published for comment. The period for comments, after one extension, expired on January 19. During the period since November 9, the Commission has identified some half-dozen principal areas of controversy in connection with the draft regulations. The purpose of this notice is to outline the Commission's current intentions as to the recommendations that we should make to the Minister of Consumer and Commercial Relations and, through him, to the Cabinet with respect to three of those areas. A similar notice will be published in the near future as to the other principal areas, which are the application of the segregation requirements to integrated firms and the calculation of net free capital requirements as to trading in futures based on financial instruments.

### I. REGISTRATION REQUIREMENTS

### (a) Introducing Brokers and Non-Resident Carrying Brokers

The draft regulations contemplate that an introducing broker may obtain registration in order to enable him to deal with a non-resident carrying broker, if the latter complies with the minimal requirements outlined in section 8 of the draft regulations. Extensive further consideration of this topic has led the Commission to conclude that the provisions of the draft regulations in this connection should be modified, as follows:

- registration on this basis should be obtained only if the non-resident carrying broker is prepared to assume a degree of responsibility for the introducing broker equivalent to that which the non-resident carrying broker would have if the introducing broker acted as a salesman on the staff of the non-resident carrying broker. This will require a form of indemnification or similar document, which will be discussed with prospective registrants affected by this provision;
  - in some cases, prospective registrants as introducing brokers now operate with only one qualified individual available to deal with clients. On the basis of its review of this aspect of the industry, the Commission has concluded that the volatile and highly levered nature of this speculative trading activity will ordinarily preclude effective customer servicing unless the firm has at least three fully qualified individuals available, or, at the minimum, two such individuals together with a capable assistant who is able to refer customers' calls in an effective manner. Accordingly, an applicant for registration will be expected to demonstrate either that it has this availability of personnel or that special circumstances are present that enable it to provide its customers with adequate service despite a lesser availability of personnel;

- the draft regulations contemplate a minimum capital of \$25,000 for introducing brokers, together with adequate insurance. Representations have been received that these requirements are unduly onerous, and that they are not sufficiently onerous. After consideration of all these representations, the Commission has concluded that it should recommend that the requirements be unchanged except that the \$25,000 should be increased to \$50,000, although the Director should have the right to reduce this requirement in any case where he feels that a lesser requirement is appropriate for a particular registrant;
- the category of introducing broker is designed to deal with a specific existing situation. Some integrated firms that carry on or propose to carry on a commodity futures business have indicated that they might wish to consider registration in this category. The Commission does not consider this to be appropriate and will suggest that the regulations include a provision denying registration to a firm that is affiliated with a registrant under The Securities Act.

### (b) Futures Commission Merchants

As indicated above, the Commission has concluded that, absent special circumstances, an introducing broker needs not less than three fully qualified persons (or two such persons together with a competent assistant) in order to provide effective service to its customers. In the Commission's view, this need is also applicable to futures commission merchants - again, absent special circumstances. This would not preclude a registered futures commission merchant from having a branch office in Ontario with a lesser staff availability, although the arrangements for such branch offices should be reviewed on a case-by-case basis with the staff of the Commission.

Questions have been raised with the Commission concerning the treatment for capital purposes of transactions initiated with one Ontario registrant and carried out through another Ontario registrant. The Commission contemplates that the capital requirements in the regulations will be modified to make it clear that, in such situations, only one of the firms involved will be required to adjust its capital with respect to such transactions.

### II. APPLICATION OF NON-RESIDENT OWNERSHIP RESTRICTIONS

As published, the draft regulations do not contemplate the application to commodity futures registrants of restrictions on non-resident ownership akin to those under The Securities Act. The Commission has received representations from The Toronto Stock Exchange and the Investment Dealers Association of Canada that such restrictions should be imposed. Representations to the contrary have been received from The Winnipeg Commodity Exchange. After consideration of those representations, the Commission has concluded that, in its view, restrictions on non-resident ownership are not necessary at this time for registrants under The Commodity

Futures Act, although the situation should be kept under continuous review. Further, as noted below, some protective measures may be necessary at a later date to contribute to the growth and development of Canadian commodity futures markets.

In reaching its conclusion that non-resident ownership restrictions are not necessary at this time under The Commodity Futures Act, the Commission has taken cognizance of the following:

- new entrants into the industry will be subject to consideration and approval by the federal Cabinet under the Foreign Investment Review Act and, to obtain such approval, must satisfy the Foreign Investment Review Agency that their entry would be of significant benefit to Canada;
- the only commodity futures exchange currently operating in Canada is The Winnipeg Commodity Exchange. Of 61 members of this Exchange that operate as futures commission merchants, 32 are non-resident controlled;
- the bulk of transactions in commodity futures effected by Ontario residents are on exchanges in the United States. This industry therefore differs in a fundamental respect from the securities industry in which active trading markets exist in Canada in Canadian-issued securities;
- because the bulk of trading occurs in the United States, the bulk of transactions will flow across the border regardless of what restrictions on non-resident ownership are adopted and the Commission is loath to recommend the introduction of a regulatory regime which would deny direct access by Ontario residents to the firms in the United States that are responsible for the processing of their transactions;
- the major firms in the United States that specialize in commodity futures already have Ontario presences, either directly or through introducing brokers, and hence would qualify for "grandfather" treatment if non-resident restrictions were adopted. Even apart from the other considerations that militate against non-resident ownership restrictions, it is doubtful whether the marginal degree of protection provided to the Canadian industry by exclusion of the other firms would justify the administrative apparatus involved.

The representations made by The Toronto Stock Exchange referred to the possible introduction on that Exchange of a futures market in Canadian financial instruments, possibly to be expanded subsequently to include futures contracts on goods more usually regarded as commodities. The Commission can see much merit to this possibility, but has not been persuaded that non-resident ownership restrictions are dictated by the desire to ensure that the TSE market is successful.

Indeed, the Commission feels that there is a substantial possibility that the provision of an open and competitive marketplace for commodity futures in this province would generate a degree of interest in these instruments which will provide a fertile environment within which the TSE's proposal could encounter a degree of success that it might not otherwise have done.

However, we recognize the desirability of an expanded Canadian marketplace in commodity futures and that, at least initially, the development of such a marketplace might be dependent for its success on some measure of regulatory protection. Accordingly, when the advent of the proposed market is more imminent, we will be prepared to discuss with the TSE any suggestions that it may have to this end, that are more focussed on the objective being sought than would be a prohibition of new non-resident entry. The objective should be to arrive at a regulatory technique that could feasibly deal with the problems raised by the TSE but that falls short of the full panoply of restrictions on non-resident ownership that has been found necessary under The Securities Act.

Our conclusion that no recommendation should be made at this time for restrictions on non-resident ownership in the context of registration under The Commodity Futures Act, 1978 is based on considerations very different from those relevant to the corresponding restrictions under The Securities Act. Canada has an extensive and important domestic securities market, and the protection of Canadian control over this market is a recognized policy objective. Accordingly, these conclusions are not relevant to the study we have currently in progress as to the securities-related activities that should be permissible in Ontario for non-Canadian firms not currently registered here.

### III. EXCLUSIVITY OF OCCUPATION

The draft regulations contemplate that, within three years after proclamation of The Commodity Futures Act, 1978, salesmen would be obligated to elect to specialize either in commodity futures or in securities. This proposed requirement has been the topic of much discussion. Based on that discussion, the Commission has concluded that it should delete the provision from the draft regulations to be submitted to the Minister.

During discussions with various representatives of the industry it has become clear that there is a full awareness of the need for commodity specialization. Some firms deal only in commodities; some have separate departments dealing only with commodities; others have experts who handle both commodity and security business. The Commission, however, has been concerned about another group composed of those salesmen who handle both commodity and security orders but who lack the necessary expertise to service properly the public's needs in the complex world of commodity markets. Such deficiencies are likely to be offset by proper management control and supervision and since the regulatory requirements are stringent in this matter, it is felt that the public will not be placed in jeopardy by any individual who although not a specialist is adequately supervised by a competent superior. Since, too, it is felt that with the growing demands of the public for expert assistance and the ever-increasing competition for commodity commission revenue, the industry will quickly move towards in-house specialization and that, therefore, there is no need to stipulate specific expertise or the time by which it should be reached.

# BULLETIN

**OF** 

## ONTARIO SECURITIES COMMISSION

**FOR** 

March, 1979

Issued Monthly by the
ONTARIO SECURITIES COMMISSION

10 WELLESLEY STREET EAST, TORONTO, ONTARIO M7A 2H7

### **EXPLANATORY NOTES**

Information contained in this report has been summarized from reports filed with the Commission.

The name of the issuer is followed by a brief description of the class of security the name of the person or company reporting and his or its relationship to the issuer. If a person has an indirect interest in the securities reported, e.g., through holding companies, affiliate companies, partnerships, trusts or other entities, this is shown. Symbols are used in the column "Transaction and Ownership Symbol" to indicate the nature of ownership i.e., direct or indirect. Similarly the character of transactions is indicated provided the transactions are other than a purchase or sale. (See guide to symbols below):

### **GUIDE TO SYMBOLS**

RELATIONSHIP	(appearing after the name reported)
"B"	—Beneficial Owner (direct or indirect) of equity shares of a corporation carrying more than 10% of the voting rights attached to all equity shares of the corporation outstanding.
"D"	—Director of principal company.
"DI"	—Director of a company which is an insider of the principal company.
"K"	-Exercises control or direction (direct or indirect) of equity shares of a corporation carrying more than 10% of the voting rights attached to all equity shares of the corporation outstanding.
"S"	—Senior Officer of principal company.
"SI"	—Senior Officer of a company which is an insider of the principal company.

### NATURE OF OWNERSHIP

No symbol —Securities are beneficially owned directly.

Symbol #1 — The reporting person or company beneficially owns and/or has control or direction over securities which

are held by a company, associate, partnership, trust or other entity.

### CHARACTER OF TRANSACTION

No symbol	—purchase or sale	"M"	—internal transfer
"A"	—bequest or inheritance	"Q"	—qualifying share
"C"	—compensation	"R"	-redeemed (called, Matured)
"E"	exchange or conversion	"T"	stock dividend
"F"	—exercise of rights, etc.	"V"	—stock split
"G"	—gift	"X"	-exercise of option
"IR"	—initial report	"Z"	—distribution

<sup>\*</sup>Returned for reconciliation purposes.

### DECISIONS, ORDERS AND RULINGS

IN THE MATTER OF THE WINNIPEG COMMODITY EXCHANGE
- and of SECTION 34 OF THE COMMODITY FUTURES ACT, 1978
- and of SECTIONS 20 AND 59 OF THE SECURITIES ACT

Hearing:	Monday,	January	15,	1979
----------	---------	---------	-----	------

J. D. A. Jackson

nearing.	Monday, January 15, 1979	
Present:	James C. Baillie, Q.C. H. S. Bray, Q.C. D. L. Johnston E. S. Miles R. T. Morgan W. A. Simonton	Chairman Vice-Chairman Commissioner Commissioner Commissioner Commissioner
	K. E. Boast R. N. Cockburn D. D. Walters	for the Commission
	R. J. Murphy G. R. Hunter, Q.C.	for The Winnipeg Commodity Exchange and Clearing House

This hearing involved two applications. The first was an application by The Winnipeg Commodity Exchange to permit sale to Ontario residents of the proposed options contracts on gold futures ("Gold Options") which are to be traded on the WCE. It is not clear whether the Gold Options will constitute securities within the meaning of The Securities Act, but the application is predicated on the conservative basis that they will and hence that they come within the regulatory ambit of that Act. The request is that the Commission make an order under section 20 or section 59 of The Securities Act to permit the distribution of Gold Options in Ontario without the filing of a prospectus and to permit the participation in such distribution of firms that carry on a commodity brokerage business if they are registered under The Securities Act.

for The Toronto Stock Exchange

Consideration of this application necessitates an analysis not only of the Gold Options themselves but also of the arrangements for their trading and for clearing of transactions. A wider examination of these matters would in any event be necessary under section 34 of The Commodity Futures Act, 1978 (adopted by the Ontario Legislative Assembly

but not yet proclaimed) prior to recognition by the WCE under that Act. In these circumstances, the WCE requested that we concurrently consider a second application, for an advance determination that the WCE merits recognition under section 34 of The Commodity Futures Act. Success of the latter application would mean that we will be in a position to recognize the WCE under the new Act, without any further hearing, when that Act becomes effective, unless some material matter intervenes to affect the decision. It was understood that the second part of the application does not extend to acceptance under section 36 of The Commodity Futures Act of the futures contracts traded on the WCE. Further information as to those contracts must be collected before we will be in a position to consider their acceptance.

Since the matters relevant to the application for recognition under The Commodity Futures Act provide helpful background to those relevant to the application under The Securities Act, we turn first to the application for recognition.

# APPLICATION FOR RECOGNITION OF THE WCE UNDER THE COMMODITY FUTURES ACT, 1978

### Background

Canada's only commodity futures exchange, the WCE was established in 1887 and has an important place in the marketing of Canadian grains. It has members from 10 countries, among whom firms with direct commercial involvement in the commodities that are traded on the WCE predominate, although the 318 members also include 40 futures commission merchants and an additional 21 members who act as such "in a secondary capacity". The WCE is an important Canadian marketplace, particularly for those with a commercial interest in the commodities traded; WCE statistics indicate that in 1978 some 61% of total volume was attributable to hedging transactions, with the balance divided between speculative (30%) and spreading (9%) transactions.

This point - the use which its customers make of transactions on the WCE - recurred frequently during preliminary discussions with the WCE and during the public hearing. Commodity futures markets serve important economic functions through the provision of mechanisms for price determination and hedging of risks. These mechanisms cater to the needs of persons whose businesses involve use of the underlying commodities, or related commodities. As an incidental but nonetheless important purpose, commodity futures markets provide a vehicle for speculative transactions. By so doing, they enable speculators to make financial commitments on the basis of their predictions as to trends in market prices, and they harness the trading of these speculators to provide liquidity to the marketplace as a whole. The Commodity Futures Act is

oriented primarily to speculative transactions, containing exemptions for hedgers from many of its substantive provisions. Accordingly, a number of references are made in these Reasons to use of the WCE by speculators.

A closely related matter merits reference here. The six grains futures contracts traded on the WCE (domestic feed wheat, domestic feed oats, domestic feed barley, rye, flaxseed and rapeseed) are affected by various controls enforced principally at the federal level, but also at the provincial level in Canada. These controls vary from time to time and are not uniform among the types of grains, but they affect marketing, transportation and other aspects of the production and distribution process. It is possible that these controls might limit the feasibility of development of a liquid speculative market in the futures contracts. This possibility will be of direct relevance in our pending review of the individual contracts to determine whether they should be recognized under section 36 of The Commodity Futures Act. The possibility is, however, relevant background to the present application and is alluded to below.

### Applicable Regulations

Section 34 of Ontario's Commodity Futures Act includes among the criteria by which an application for recognition of a commodity futures exchange situate outside Ontario is to be tested, whether "the rules and regulations applicable to exchange members and clearing house members are in the public interest and are actively enforced" and whether "the exchange and its clearing house are subject to appropriate government controls". These criteria dictate an analysis of the regulatory structure, but we would have wished to undertake such an analysis even apart from a statutory requirement since this seems to us an important aspect of exchange operations.

The Grain Futures Act, a federal statute passed in 1939 but not implemented until 1975, authorizes the Canadian Grain Commission to regulate the trading of grain futures on the WCE. In September, 1975, that Commission appointed a Supervisor, whose full time occupation is to "observe trading in grain futures" on the WCE and to make periodic reports thereon to the Canadian Grain Commission, including immediate reports of "any indications of a condition prejudicial to the public interest arising from speculation or from transactions in grain futures". We were assured that in practice the interest of the Supervisor extends to all aspects of trading on the WCE, not being limited to grain futures.

The importance of the regulatory activities of the Canadian Grain Commission is emphasized by the approach taken by the Province of Manitoba. The Commodity Futures Act (Manitoba), which came into force in October, 1978, reflects a policy decision that reliance should be placed on self-regulation by the WCE, supplemented by the regulatory activities of the Canadian Grain Commission. Accordingly, the legis-

lation (in combination with a corollary amendment to The Securities Act (Manitoba)) exempts the WCE, contracts traded on the WCE and the distribution of those contracts to the Manitoba public from the requirements that would otherwise apply under The Securities Act (Manitoba). The only involvement of the Securities Commission with WCE trading is that it may initiate investigations and, where appropriate, revoke the right of a person to trade in WCE contracts.

Responsibility for regulation of the WCE is, then, divided between the Canadian Grain Commission and the self-regulatory activities of the WCE, subject only to the right of the Manitoba Securities Commission to initiate investigations. Our impression is that the manner in which these responsibilities are carried out is influenced by a history of close cooperation between the Grain Commission and the WCE and by the fact that the number of participants on the trading floor and the volume of transactions carried out are comparatively small when contrasted with the degree of participation and the volume of other exchanges. In consequence, working relationships are informal but effective both within the WCE and between it and the Canadian Grain Commission. These relationships result in a smoothly-operating exchange on which decisions are taken informally, rarely if ever encumbered by formal procedures such as hearings.

An excellent example of these relationships is provided by the steps taken to verify that, as the expiry date approaches for contracts with a certain delivery date, the remaining open interest can be adequately satisfied by those persons with short positions through delivery of available grain which can, in turn, effectively (i.e., as to financing capability and physical capability to take delivery of the relevant amount at the relevant delivery point) be accepted by those with long positions. That this condition might not prevail is a constant concern both of the self-regulatory authorities in the WCE and of the Supervisor. Confirmation that the concern is not merely theoretical is frequently provided by the pattern of trading as the final trading day draws near. In a fully liquid market, the futures contract price should draw near to the cash market price as the delivery date approaches and the futures contract price for delivery on a certain date ought ordinarily to be less than a contract for delivery on a later date by an amount sufficient to reflect carrying charges on the physical commodity between the dates. By contrast, different pricing relationships, referred to as pricing "inversions", occur with some frequency on the WCE; the futures contract price for the current month's delivery may exceed the cash price and may also exceed the price for a later delivery date. These inversions demonstrate a lack of available supply to enable those with short positions to liquidate them at prices close to the cash market price. This is probably attributable at least in part to the regulated nature of the Canadian grain market and to characteristics of transportation arrangements in this country that necessitate significant advance planning to arrange for grain to be at a certain delivery point on a certain date. In consequence, those in a long position as the delivery date approaches, and who are in a position to take delivery, are in an advantageous

bargaining position particularly with respect to persons in a short position who are unable to make delivery because of inadequate financing or inadequate arrangements to obtain the grain they would be required to deliver under their contracts.

Members of the WCE staff and the Supervisor maintain an informal surveillance as to the number of open positions in the various contracts. Should this surveillance indicate an unduly large number of open positions in any particular commodity, the staff can refer the matter to the Positions Evaluation Committee, which is regarded as one of the most senior and prestigious committees of the WCE. The committee may then direct the staff, on a confidental basis, to ascertain from the WCE members the identity of the participants in the contracts and whether they intend to make or accept delivery. If this inquiry indicates a distorted position the committee can, on an informal basis, deal with clearing members, asking them to arrange for speculative positions to be liquidated prior to the delivery date. If these informal discussions are unsuccessful, a wide range of remedies may be considered by the committee for recommendation to the Board; these could include a sharp increase in customers' margin requirements, or even a change in delivery dates if that seems essential. We understand that, in practice, it is rarely, if ever, necessary for the committee to resort to expedients of this type.

The WCE has a full panoply of other committees with the power to deal with any irregularity that may arise. Representatives of the WCE acknowledge that these committees have rarely been called upon to take any formal action. This is consistent with our observation above, that the WCE is a sufficiently small and closely knit organization that any problems which arise can be detected and sorted out on an informal basis. The constant presence of the Supervisor on the floor during trading hours is, of course, an added incentive to the successful operation of this system. However, it would not alone be sufficient for that purpose. The Supervisor was present as a member of the audience at the public hearing conducted to consider this application, but neither he nor any other representative of the Grain Commission testified. Accordingly, our impression of their activities results from the testimony given by members of the WCE and from informal contacts during a visit paid to Winnipeg by representatives of this Commission. Our impression is that the Supervisor shares the concern of the WCE with the nature of open positions as expiration of a delivery month approaches and that a significant portion of his attention is devoted to this topic. We question whether he would, in any event, be in a position to detect manipulative or other improper activities if they were to occur, since physical presence on the floor facilitates only an observation of the outward manifestations of trading patterns.

In sum, our feeling is that the existing regulatory structure is adequate for the WCE as it now operates, despite the fact that the authority of the Canadian Grain Commission and, hence, of the Supervisor does not technically extent to trading in gold futures. But the WCE is an ambitious organization. The proposed initiation of trading in Gold

Options is only one of a number of proposals designed to increase the range of instruments traded on the WCE. Further, there is an increasing interest among Canadians in commodity futures trading both for speculative and for hedging purposes. The WCE hopes to participate in the benefits of this greater interest through a substantial expansion in the volume of trading in the WCE. It is already working towards a revision of its administrative structure to cope with this expected larger volume of activity, and is about to move to new quarters with more modern facilities. We hope that this effort will continue and that the Canadian Grain Commission will cooperate actively to ensure the continued credibility of the regulatory pattern applicable to the WCE as the new developments germinate. We were advised that work is now in progress on amendments to the Grain Futures Act to bring the relationship between the Grain Commission and the WCE more in line with current conceptions as to the appropriate degree of government surveillance over self-regulatory organizations.

In this connection, it seems appropriate for us to comment on a few matters that seem to us to merit attention as the WCE adjusts to the anticipated expansion of its role. The first is the degree of informality that now characterizes the relationships. There is much to be said for informal relationships; among responsible persons, they can be more adaptable to circumstances and facilitate a more expeditious reaction to events than can a formal apparatus. The WCE should, in our view, take care not to lose these benefits. But the current reliance on informality may represent a position on the spectrum that will prove too extreme as the importance of the WCE increases. Two examples will suffice. The WCE has net free capital requirements applicable to members, but they are unpublished and not available in detail either to members or to the public. That seems to us an inappropriate situation; these and any other rules imposed by the WCE on its members should be readily available for public review and comment. We were told that the WCE has recently been advised that its net free capital rules are more onerous than those applied by The Toronto Stock Exchange and the Investment Dealers Association to their members, and that the WCE rules are therefore to be revised. We trust that this revision will be carried out only after opportunity for public debate and comment and that any other related factors will be considered. One such is the availability of the National Contingency Fund as a protective mechanism should capital problems affect a TSE or IDA member.

The second example is the review by the Canadian Grain Commission of the WCE rules. Particularly for rules that have an anticompetitive impact, this review is an important part of the system. Perhaps its most important manifestation is in the fixed commission structure. We were told that the WCE has been advised by legal counsel that fixed commission rules approved by the Canadian Grain Commission will be immune from attack under the Combines Investigation Act. Accordingly, the WCE has a fixed commission structure applicable to trading in grain but not to trading in gold, since the latter is not technically within the jurisdiction of the Grain Commission. In the absence of testimony from a representative of that Commission we are unable to comment on the extent of the review accorded by the Commission to the fixed commission rules, but WCE testimony indicated that it was informal. Apparently the rates were settled in discussions between

representatives of the two organizations with little or no opportunity for public debate or comment. The very fact that this approval procedure is being relied upon to provide immunity from the Combines Investigation Act signals the need for greater public involvement so that affected persons may influence developments.

Another aspect of WCE operations to which we hope that particular attention will be paid in coming months is the role of the speculative trader. Most of the members of the WCE's governing committee have a background in the community of users - firms with direct commercial interests in WCE-traded commodities. This background is shared by the Canadian Grain Commission. Both recognize the contribution made by speculators, but we feel that as the volume of speculative trading increases changes may be necessary to ensure that speculators are able to trade on a basis equal to hedgers. This comment is a reaction specifically to the great importance accorded by the WCE and the Supervisor to the areas of responsibility of the Positions Evaluation Committee. These areas are effectively dealt with, but at the cost of subjecting speculators to the possibility of being forced by increased margin requirements to close out their positions earlier than they would wish, and even to the possibility of changed delivery dates. We are not satisfied that the currently-used position evaluation techniques will be as successful if the WCE trading increases to hoped-for levels; nor are we satisfied that the emphasis given this area is consistent with full equality in the treatment of speculators.

We should stress that these comments are not intended to be critical of the WCE as presently operated. At current trading volumes, it is well run and provides an effective and fair trading mechanism. Its management recognizes that the changing regulatory environment and the WCE's own plans for expansion dictate a revision of the regulatory milieu in which it operates. This application is one example of that. We were pleased with the report from the WCE representatives that they are pressing for an extensive revision of the Grain Futures Act and regulations thereunder. We trust that this will soon materialize and that a similar willingness to adapt to changing circumstances will be demonstrated by the Grain Commission and the WCE in their administration of their respective responsibilities.

### Other Considerations

Section 34 of The Commodity Futures Act sets out a number of criteria that we must take into account in our determination whether to grant recognition to a commodity futures exchange situate outside Ontario. The written submission made by the WCE included comments addressed to each of these criteria, which were supplemented by our staff's prior review of the application and by testimony given during the hearing. The following are our comments on the several matters listed in section 34:

(a) Whether the clearing and other arrangements made and the financial condition of the commodity futures exchange, its clearing house and its members are such as to provide reasonable assurance that all obligations arising out of contracts entered into on such commodity futures exchange will be met.

We received from Mr. William B. Parrish a submission on behalf of Winnipeg Commodity Clearing Ltd., and the Chairman of the Commission and a consultant to the Commission visited that corporation's facilities in Winnipeg. Based on the information so obtained, and on other enquiries, we are satisfied that the clearing corporation is efficiently run and is successful in the important record-keeping function and in the even more important function of making prompt margin calls on clearing members when market circumstances dictate.

The statutory language quoted above requires us to go beyond this in our assessment. We must consider the financial condition of the WCE, its clearing house and its members in order to satisfy ourselves that obligations arising out of contracts will be met. The commodity futures markets may well be unique in the degree of volatility to which they are subject and in the extent to which traders may leverage their transactions. It is impossible to be completely certain that circumstances will never arise in which the obligations under contracts will not be met. However, a reasonable assurance can be derived from a complete regulatory system, effectively administered. The principal components of such a system are net free capital requirements applicable to members; adequate margin requirements expeditiously enforced; and procedures to screen prospective customers in order to ensure that traders are limited to persons who are financially able to take the risks and to satisfy the potential financial commitments that commodity futures trading involves.

Comments are made above as to the net free capital requirements of the WCE. Its margin requirements are formulated by men who are vitally concerned with the continued solvency of the WCE and its members, and who enforce the requirements effectively. Accordingly, we have confidence that the margin requirements are, and will continue to be, appropriate. As to customer screening mechanisms, regulations under The Commodity Futures Act will require their adoption for Ontario trading and we understand that the WCE is considering the adoption of similar requirements applicable to trading by its members wherever that trading may occur. We encourage the WCE to adopt such requirements.

In these circumstances, we feel that criterion (a) is satisfied.

(b) Whether the rules and regulations applicable to exchange members and clearing house members are in the public interest and are actively enforced.

We have not conducted a detailed review of all the rules and regulations of the WCE. That is the responsibility of the Canadian Grain Commission and not of the Ontario Securities Commission. However, our general review of the WCE's affairs has aroused no serious concern as to the content of its rules and regulations. We comment above on the enforcement of these rules and regulations as part of the self-regulatory activities of the WCE, supervised by the Canadian Grain Commission.

(c) &

(d) Whether floor trading practices are fair and properly supervised and whether adequate measures have been taken to prevent manipulation and excessive speculation.

The comments made above under "Applicable Regulations" are also relevant to these criteria.

(e) Whether adequate provision has been made to record and publish details of trading including volume and open interest.

We are satisfied with the accuracy of the following extract from the written submission of the WCE:

The Winnipeg Commodity Exchange transmits continuous current quotations throughout the futures and options trading sessions over international wire circuits; records the prices of executed transactions; and publishes daily the opening, high, low and closing prices together with reports on trading volumes and open interest through the financial media in Canada and the United States. It provides material for regular, daily radio broadcast. Other regular publications cover similar figures together with information on grain in store, on weekly, monthly, and annual bases.

Accordingly, this criterion is satisfied.

(f) Whether the exchange and its clearing house have undertaken to comply with section 35.

The WCE has advised us that, upon recognition under section 34, it will provide us with a written undertaking to comply with

section 35 of The Commodity Futures Act, which requires the filing with this Commission of each by-law, rule, regulation or policy forthwith after its adoption by the commodity futures exchange or clearing house.

(g) Whether the exchange and its clearing house are subject to appropriate government controls.

The nature of the government controls to which the WCE is subject is reviewed under "Applicable Regulations".

# Conclusions as to recognition of the WCE under section 34 of The Commodity Futures Act, 1978

After consideration of the regulatory structure applicable to the WCE and of the criteria listed in section 34, we are satisfied that (unless there is material intervening development) the WCE should be recognized under The Commodity Futures Act, 1978 immediately upon the proclamation of that statute. Our staff has been instructed to initiate an immediate discussion with the WCE in order to obtain information on which we may base a decision as to the recognition under section 36 of the contracts traded on the WCE.

As indicated in the discussion under "Applicable Regulations", we concur with the WCE that the Grain Futures Act requires revision, with a concomitant review of the relationship between the WCE and the Canadian Grain Commission. Further, we encourage the WCE to continue the work in which it has been engaged recently in revising and expanding its selfregulatory activities and procedures in order to ensure their adequacy to meet anticipated increases in the volume of trading and in the variety of instruments traded. All of these changes will, we anticipate, have a substantial impact on the WCE in the comparatively near future. In these circumstances, we propose to maintain a continuing dialogue with the WCE so that we will remain conversant with current developments. This will, of course, be an information-obtaining relationship rather than a regulatory relationship, since we have no responsibility for the regulation of the WCE. Based on information so obtained, we propose to review the situation a year after The Commodity Futures Act, 1978 comes into force in order to determine whether any of the facts set out in this decision are materially affected by intervening developments. We will decide at that time whether a further public hearing is necessary in order to provide interested parties with an opportunity to comment on the situation.

### APPLICATION FOR PROSPECTUS EXEMPTION AS TO TRADING IN GOLD OPTIONS

The proposed creation of a trading market in Gold Options is a significant business innovation for the WCE. In 1972, the WCE introduced the world's first exchange-traded futures contracts in gold

bullion. At that time, restrictions on the ownership of gold by citizens of the United States precluded the development of a similar market in that country. Accordingly, the WCE gold futures market experienced a substantial volume of trading until commodity futures exchanges in the United States developed competitive markets, commencing in 1975. The WCE hopes to experience a similar trading windfall with options on gold futures contracts. The creation of markets in these instruments within the United States is being postponed by Congressional fiat pending the implementation of an appropriate regulatory programme.

The Gold Options will be complicated and technical instruments. Their effective use will require reasonable sophistication on the part of the investor or speculator and substantial knowledge on the part of his salesman. Supervision of the trading patterns, educational requirements, capital requirements and other aspects of this new market will involve substantial new self-regulatory responsibilities for the WCE. We are satisfied that the WCE is approaching these responsibilities in a careful and competent fashion, aware of their significance and of the potential pitfalls. A few comments are in order to illustrate the complexities of the proposed new instrument and hence the serious nature of the self-regulatory responsibilities it entails.

Gold futures contracts are available on the WCE in two sizes: 400 ounces (the "Standard Contract") and 100 ounces (the "Centum Contract"). WCE transactions in gold futures are carried out in United States dollars, and gold is currently trading at prices approximating \$240 per ounce (U.S.). Accordingly, the purchaser or the seller of a Centum Contract assumes an obligation to buy or to sell approximately \$24,000 worth of gold unless the obligation is first liquidated by acquisition of an offsetting contract. The extent to which leverage is available under these contracts is indicated by the fact that the minimum margin required by WCE rules to be put up by the speculator who purchases or sells a Centum Contract is \$700 as initial margin and \$350 as maintenance margin.

Gold futures contracts have a recognized place in the range of available instruments. They can be of great value in the conduct of speculative, hedging and spreading activities but they possess a substantial disadvantage in that, just as the potential profit of a speculator attributable to fluctuations in the price of gold while the contract is outstanding is virtually unlimited, so also is prospective loss virtually unlimited. The seller of a contract is obligated to deliver the specified amount of gold or to enter into a liquidating trade regardless of how much the price of gold may increase. Unless his transaction is hedged, this could involve a substantial exposure, particularly if the price of gold rises so quickly that he is "locked in" through a series of trading days during each of which the price rises by the maximum of \$10 (U.S.) at each opening. The purchaser of a gold futures contract is also subject to loss if the price of gold declines substantially before he enters into a liquidating trade.

Gold Options will enable speculators to quantify their maximum loss. Initially, the WCE proposes to provide a trading market only in "calls" on gold futures contracts. The purchaser of a Gold Option that is a call will be protected in that his maximum loss will be his premium paid plus transaction costs, while his maximum gain will be, in theory, unlimited - dependent only on increases in the price of gold while the Gold Option is outstanding. (At a later date the WCE proposes to initiate trading in "put" contracts so that speculators who anticipate a decrease in the price of gold may purchase an option to sell gold under a gold futures contract, with their maximum exposure similarly being limited to the cost of the option plus transaction costs.)

There will, of course, be a price involved in this new type of protection. The purchaser of a Gold Option will be required to pay a "premium", thereby increasing the extent of the increase in the price of gold that must occur before a profit is earned. Assume, for example, a speculator who pays a premium of \$12 per ounce to acquire an option on a gold futures contract at a striking price of \$240 per ounce when the price at which that contract is trading on the WCE is \$237 per ounce (Gold Options will be exercisable at pre-determined striking prices, by comparison with the underlying futures contracts which trade on the basis of current market prices). The speculator may anticipate that it will be necessary for the price of gold to increase by approximately \$15 per ounce before he will be able to liquidate his position without incurring a loss. By contrast, only a comparatively small increase would have been necessary had the speculator invested directly in a gold futures contract.

This "premium", which may be regarded as the price paid by the investor or speculator for having his maximum loss quantified, is also the price received by the writer of the option for entering into what would otherwise be an uneconomic arrangement. Should the price of gold increase while the Gold Option is outstanding, the writer's theoretical exposure is unlimited. By contrast, if the price of gold decreases the option will not be exercised; accordingly, the premium represents the maximum profit received by the writer and must compensate him for acceptance of an exposure to theoretically unlimited loss. WCE representatives anticipate that there will be a sufficient interest in this new market so that the premium will be properly determined by the law of supply and demand, reflecting prices in the gold market in general, the relationship between the current price of the underlying contract and the exercise price of the option and the amount of time remaining before the expiry date of the option. Representatives of the WCE have been in touch with financial institutions in Europe and in the United States and are sanguine that those institutions will take an active interest in the new market, ensuring an adequate availability of Gold Options. That is an important element of the market, for otherwise premiums might increase to unacceptable levels. As mentioned above, we are satisfied that careful and competent preparation for the advent

of this market has been carried out by the WCE. Further, we received testimony as to "trial runs" that have been undertaken successfully. While certitude as to corresponding success in the practical application of the system can not be attained until after the market has opened for trading, we have no reason to anticipate serious difficulties at the technical level. This does not, however, of itself meet all the questions as to which we feel that we should be satisfied before granting this application.

The most obvious additional questions are in the customer protection area. Careful disclosure is necessary of the technical nature of Gold Options and of the risks inherent in them; most importantly, the speculator must be told that the price he pays for quantification of his maximum loss is that, for him to make a profit, the price of gold must increase more than would have been necessary had he purchased a gold futures contract. For similar reasons, the salesmen should be well qualified and versed in the intricacies of this new instrument. Self-regulatory supervision should be available and capital requirements are a necessity. During the hearing, we were supplied with a draft set of Conditions to be attached to our order, worked out by our staff in consultation with representatives of the WCE. These Conditions, reproduced at the end of these Reasons, seem to us sufficient to meet our principal concerns with customer protection.

We also reviewed a draft disclosure statement which, under the suggested Conditions, would be delivered to each prospective purchaser of Gold Options. This statement contains a reasonable description of the Gold Options, although the impact of the document may be blunted by the fact that a technical "glossary" of terms appears immediately after the cover page. The quality would, we feel, be improved if a statement of risks in plain language could be added before the glossary, highlighting such matters as the fact that the price of gold must increase by an amount sufficient to cover the premium if a loss is to be avoided.

Counsel for the TSE concurred as to the adequacy of the disclosure statement, while raising a technical question as to the nature of the contractual relationships inherent in Gold Options. This point has subsequently been discussed with representatives of our staff and representatives of the WCE and of Winnipeg Commodity Clearing Ltd. and we understand that Winnipeg Commodity Clearing Ltd. proposes to revise its by-laws in order to avoid any concerns to which the point might otherwise give rise.

During the hearing, we received helpful testimony from Mr. Terry Claassen who was, until recently, Director, Division of Trading and Markets of the Commodity Futures Trading Commission in the United States. He outlined some of the difficulties that have arisen in the regulation of options traded apart from exchanges, and also described the current embargo on development of exchange-traded options on

commodity futures contracts. We discussed with Mr. Claassen the reasons for this embargo. He indicated that the concerns that led to the embargo do not involve questions of principle as to whether exchangetraded options will be appropriate in the public interest. Rather, the concerns relate to the additional administrative workload that these trading markets will create and the responsibilities they will involve for regulatory authorities. In summary, Mr. Claassen's opinion was that the concerns expressed in the United States were not of a nature that should preclude us from accepting this application. We concur with that opinion. However, Mr. Claassen's comments as to administrative and regulatory implications of options trading reinforces a concern as to the WCE, expressed earlier in these Reasons. Currently, the technical authority of the Canadian Grain Commission over the WCE does not extend to gold-based instruments. Accordingly, the WCE is theoretically subject to no government supervision in this aspect of its operations, apart from the limited authority of the Manitoba Securities Commission. We are placing substantial reliance on the assurances we were given by WCE members (with the Supervisor in the audience remaining silent and (presumably) acquiescent) that, in practice, the Canadian Grain Commission applies its authority more widely and that the Supervisor would not hesitate to intervene in Gold Options trading should he detect or suspect any impropriety. We trust that the anticipated revisions of the Grain Futures Act will include provisions that make explicit this wider responsibility of the Canadian Grain Commission and of the Supervisor.

For all these reasons, we are prepared to grant the requisite order to permit the sale, without a full prospectus, of Gold Options to Ontario residents through firms that carry on a commodity brokerage business and that are registered under The Securities Act. that an order under section 20 or section 59 will issue forthwith, to remain effective until proclamation of The Commodity Futures Act, 1978. Further, upon such proclamation, we will recognize the Gold Options under section 36 of that Act unless, for any reason, we fail to recognize the underlying gold futures contract. However, in view of the experimental nature of Gold Options and of the unusual regulatory position, the order and the recognition will be subject to the condition that the WCE keep our staff informed as to experience with Gold Options trading in order that we may review the situation six months after trading commences. As with the similar review proposed earlier in these Reasons of the recognition of the WCE, we stress that the relationship we envisage is an information-obtaining one rather than a regulatory one. We are not responsible for the regulation of the WCE.

We have considered whether our order under The Securities Act should be made in reliance on section 20 or section 59 of that Act. While section 59 may well be sufficiently wide for the purpose, we have concluded that the order should be issued under section 20. That is

the section relied upon for the order permitting trading in stock options on The Toronto Stock Exchange. Further, section 20 requires that a copy of the order be laid before the Legislative Assembly, and we feel that this is an appropriate step to take with a matter of this significance.

### Conclusion as to Gold Options

Accordingly, we will issue an order under section 20 permitting the sale without a prospectus of Gold Options to Ontario residents through firms carrying on a commodity brokerage business that are registered under The Securities Act. Further, we will recognize the Gold Options under section 36 of The Commodity Futures Act, 1978 immediately on proclamation of that Act unless there is some material intervening event or unless we, for any reason, fail to recognize the underlying gold futures contracts under that section. Both the order and the recognition are subject to the conditions set out below and to the additional condition that the WCE keep the staff of this Commission fully informed as to experience with the trading of Gold Options, in order to facilitate a review of the situation six months after trading commences.

The additional conditions are:

- 1. trading in the Gold Options is through the facilities of the WCE;
- 2. before a registrant may trade in the Gold Options it shall have designated a partner or officer as responsible for supervising such trading and such designated partner or officer shall have successfully completed an examination approved for use in Ontario by the Commission and prescribed by and conducted by or on behalf of the WCE for the purpose of demonstrating an adequate knowledge of the commodity futures options business and either
  - (a) the National Commodity Futures Examination, or
  - (b) the Canadian Securities Institute's Canadian Options Course and the Registered Options Principal examination;
- 3. every registrant shall furnish (i) each prospective customer prior to the opening of an account to trade Gold Options and (ii) each current customer before approving his account for such trading with a dated copy of a Summary Disclosure Statement in substantially the form submitted to the Commission at the hearing, with such revisions as may be agreed upon between the staff of the Commission and the WCE;
- 4. if there is a material change in the information contained in the Summary Disclosure Statement every registrant shall furnish each prospective customer prior to the opening of an account to trade Gold Options and to each current customer to whom a Summary Disclosure Statement was previously furnished a

dated Summary Disclosure Statement amended to reflect the material change;

- 5. subject to items 6 and 7 hereof, before a registrant may trade in Gold Options it shall submit to and have approved by the Director of the Commission a written supervisory procedure which shall include such matters as,
  - (i) professional education standards and their introduction,
  - (ii) customer suitability standards and procedures for the opening of accounts for trading in the Gold Options,
  - (iii) internal supervision and surveillance by registrants of trading in customers' accounts,
    - (iv) position and trading limits of the registrant;
- of a self-regulatory body referred to in Section 30 of The Securities Act may trade in the Gold Options if the by-laws, rules and policies of such self-regulatory body relating to trading in Gold Options have been submitted to and approved by the Commission and such by-laws, rules and policies relate to, at least, surveillance of trading in the Gold Options including regular reports of transactions by members and the matters set out in item 5 hereof;
- 7. notwithstanding items 5 and 6 hereof a registrant who is a member of the WCE may trade in Gold Options if such registrant submits to and has approved by the Director of the Commission written supervisory procedures relating to those matters set out in item 5 hereof that are not referred to in the by-laws, rules and policies of the WCE.

# ONTARIO SECURITIES COMMISSION

**FOR** 

April, 1979

Issued Monthly by the
ONTARIO SECURITIES COMMISSION

10 WELLESLEY STREET EAST, TORONTO, ONTARIO M7A 2H7

### **EXPLANATORY NOTES**

Information contained in this report has been summarized from reports filed with the Commission.

The name of the issuer is followed by a brief description of the class of security the name of the person or company reporting and his or its relationship to the issuer. If a person has an indirect interest in the securities reported, e.g., through holding companies, affiliate companies, partnerships, trusts or other entities, this is shown. Symbols are used in the column "Transaction and Ownership Symbol" to indicate the nature of ownership i.e., direct or indirect. Similarly the character of transactions is indicated provided the transactions are other than a purchase or sale. (See guide to symbols below):

### **GUIDE TO SYMBOLS**

RELATIONSHIP	(appearing after the name reported)
"B"	—Beneficial Owner (direct or indirect) of equity shares of a corporation carrying more than 10% of the voting rights attached to all equity shares of the corporation outstanding.
"D"	—Director of principal company.
"DI"	—Director of a company which is an insider of the principal company.
"K"	—Exercises control or direction (direct or indirect) of equity shares of a corporation carrying more than 10% of the voting rights attached to all equity shares of the corporation outstanding.
"S"	—Senior Officer of principal company.
"SI"	—Senior Officer of a company which is an insider of the principal company.

### NATURE OF OWNERSHIP

No symbol	—Securities are beneficially owned directly.
Combal #1	The connection manner of a connection of the state of the

—The reporting person or company beneficially owns and/or has control or direction over securities which are held by a company, associate, partnership, trust or other entity.

### CHARACTER OF TRANSACTION

No symbol	—purchase or sale	"M"	—internal transfer
"A"	-bequest or inheritance	"Q"	—qualifying share
"C"	compensation	"R"	-redeemed (called, Matured)
"E"	-exchange or conversion	"T"	-stock dividend
"F"	-exercise of rights, etc.	V	-stock split
"G"	—gift	"X"	exercise of option
"IR"	—initial report	Z	—distribution

<sup>\*</sup>Returned for reconciliation purposes.

### NOTICE

On Tuesday afternoon, April 3, the Commission convened an informal meeting with representatives of George Weston Limited, the Thomson organization and Hudson's Bay Company to discuss questions raised by Weston's as to the Thomson offer for shares of The Bay. The meeting was also attended by Mr. Fred Sparling, Director under the Canada Business Corporations Act. After representations by counsel for each of the three organizations, the Commission and Mr. Sparling met separately with representatives of Weston's and of Thomson's. When the meeting reconvened, the Chairman of the Commission made a statement. So that it will be a matter of public record, that statement is reproduced below.

SINCE THE ADJOURNMENT OF THIS INFORMAL MEETING, THE COMMISSION HAS MET SEPARATELY WITH REPRESENTATIVES OF GEORGE WESTON LIMITED AND THE THOMSON ORGANIZATION. BEFORE REPORTING ON THE RESULTS OF THOSE MEETINGS, I SHOULD COMMENT ON THE COMMISSION'S VIEW OF THE POSITIONS DEVELOPED BY THE REPRESENTATIVES OF THESE ORGANIZATIONS AND OF THE BAY DURING THEIR VERY HELPFUL SUBMISSIONS TO US.

WE ARE SATISFIED THAT BOTH OFFERORS FOR THE BAY ARE ACTING IN GOOD FAITH. WE WERE TOLD THAT THE WESTON DECISION TO PROCEED WITH AN OFFER WAS MADE IN A CONCENTRATED WEEKEND'S WORK AFTER THE COMMENTS OF THE BOARD OF THE BAY ON THE THOMSON OFFER BECAME AVAILABLE. FOR ITS PART, THE THOMSON ORGANIZATION REVISED ITS OFFER TO COUNTER THE WESTON PROPOSAL IN GOOD FAITH AND IN RELIANCE ON LEGAL ADVICE THAT THE AMENDED OFFER WAS JUST THAT AND WAS NOT A NEW OFFER. AS THE THOMSON REPRESENTATIVES POINTED OUT, PRECEDENTS EXIST WHERE EVEN MORE SWEEPING CHANGES HAVE BEEN TREATED AS AMENDMENTS WITHOUT SUCCESSFUL CHALLENGE.

DESPITE THIS, INVESTORS HAVE BEEN LEFT IN A DIFFICULT POSITION. THE WESTON MATERIAL IS TO BE MAILED TOMORROW AND CONTAINS MUCH THAT SHOULD BE CONSIDERED BY BAY SHAREHOLDERS IN THEIR DECISION. WE RECOGNIZE THAT THE TIMING PROBLEMS AROSE WITHOUT FAULT ON THE PART OF ANYONE, BUT WE ARE CONCERNED WITH THE SITUATION IN WHICH INVESTORS ARE PLACED.

IN THE MEETINGS WITH REPRESENTATIVES OF THE THOMSON AND WESTON ORGANIZATIONS, WE HAVE EXPLAINED OUR CONCERNS. AS A RESULT OF THOSE DISCUSSIONS, THE THOMSON ORGANIZATION HAS AGREED TO EXTEND THE FINAL DEPOSIT DATE UNDER ITS OFFER TO THURSDAY, APRIL 12. THIS WAS DONE VOLUNTARILY IN RECOGNITION OF THE CONCERNS WE EXPRESSED AS TO THE POSITION OF INVESTORS. THIS EXTENSION WILL PROVIDE OPPORTUNITY FOR THE WESTON OFFER TO BE CONSIDERED BY INVESTORS AND FOR THEIR ADVISERS TO COMMENT ON THE RELATIVE MERITS OF THE TWO OFFERS. FOR ITS PART, THE WESTON ORGANIZATION HAS AGREED TO WITHDRAW THE ALLEGATIONS THAT THOMSON'S MADE A NEW OFFER RATHER THAN AMENDING AN OUTSTANDING OFFER.

WE FEEL THAT THIS IS A SATISFACTORY RESOLUTION OF A DIFFICULT PROBLEM. IT ENABLES THE TWO BIDS TO CARRY ON IN ACCORDANCE WITH THE LEGISLATIVE PATTERN BUT WITH FULL INFORMATION IN THE HANDS OF INVESTORS. WE APPRECIATE THE TIME THAT HAS BEEN TAKEN BY THOSE WHO HAVE CONTRIBUTED TO THIS DECISION, AND WE APPRECIATE THE REASONABLE ATTITUDE DISPLAYED BY ALL CONCERNED.

### DECISIONS, ORDERS AND RULINGS

IN THE MATTER OF THE SECURITIES ACT R.S.O. 1970, CHAPTER 426 AND AMENDMENTS THERETO

AND

IN THE MATTER OF THE WINNIPEG COMMODITY EXCHANGE AND WINNIPEG COMMODITY CLEARING LIMITED

ORDER (Section 20)

WHEREAS THE WINNIPEG COMMODITY EXCHANGE AND WINNIPEG COMMODITY CLEARING LIMITED made application to the Ontario Securities Commission (the "Commission") on the 3rd day of January 1979 under Section 20 of The Securities Act, R.S.O. 1970, c.426, as amended (the "Act") for an order that it is not prejudicial to the public interest that section 35 of the Act not apply to trades in exchange-traded options on gold futures contracts entered into on The Winnipeg Commodity Exchange (the "Exchange") and cleared through the facilities of Winnipeg Commodity Clearing Limited (the "Clearing House");

AND WHEREAS on the 15th day of January, 1979 the Commission heard counsel for the Exchange and the Clearing House and counsel for the Commission;

AND WHEREAS the Commission is of the opinion that it is not prejudicial to the public interest to do so;

IT IS HEREBY ORDERED pursuant to the provisions of subsection 1 of Section 20 of the Act that Section 35 of the Act shall not apply in relation to a distribution to the public of each exchange-traded call option on gold futures contracts entered into on the Exchange and cleared through the Clearing House (the "Gold Options") subject to the following conditions:

trading in the Gold Options is through the facilities of the Exchange

- 2. before a registrant may trade in the Gold Options it shall have designated a partner or officer as responsible for supervising such trading and such designated partner or officer shall have successfully completed an examination approved for use in Ontario by the Commission and prescribed by and conducted by or on behalf of the Exchange for the purpose of demonstrating an adequate knowledge of the commodity futures options business and either
  - (a) the National Commodity Futures Examination, or
  - (b) the Canadian Securities Institute's Canadian Options Course and the Registered Options Principal examination;
- 3. every registrant shall furnish,
  - (i) each prospective customer prior to the opening of an account to trade Gold Options, and
  - (ii) each current customer before
     approving his account for such
     trading,

with a dated copy of a Summary Disclosure Statement in substantially the form submitted to the Commission at the hearing with such revisions as may be agreed upon between the staff of the Commission and the Exchange;

4. if there is a material change in the information contained in the Summary Disclosure Statement every registrant shall furnish each prospective customer prior to the opening of an account to trade Gold Options and to each current customer to whom a Summary Disclosure Statement was previously furnished a dated Summary Disclosure Statement amended to reflect the material change;

- 5. subject to conditions 6 and 7 hereof, before a registrant may trade in Gold Options it shall submit to and have approved by the Director of the Commission a written supervisory procedure which shall include such matters as,
  - (i) professional education standards and their introduction,
  - (ii) customer suitability standards and procedures for the opening of accounts for trading in the Gold Options,
  - (iii) internal supervision and surveillance by registrants of trading in customers' accounts
    - (iv) position and trading limits of the registrants;
- 6. notwithstanding condition 5 hereof a registrant who is a member of a self-regulatory body referred to in Section 30 of The Securities Act may trade in the Gold Options if the by-laws, rules and policies of such self-regulatory body relating to trading in Gold Options have been submitted to and approved by the Commission and such by-laws, rules and policies relate to, at least, surveillance of trading in the Gold Options including regular reports of transactions by members and the matters set out in item 5 hereof;
- 7. notwithstanding conditions 5 and 6 hereof a registrant who is a member of the Exchange may trade in Gold Options if such registrant submits to and has approved by the Director of the Commission written supervisory procedures relating to those matters set out in condition 5 hereof that are not referred to in the by-laws, rules and policies of the Exchange; and

8. the Exchange shall keep the staff of the Commission fully informed as to experience with the trading of the Gold Options in order to facilitate a review by the Commission of such trading on or about that day 180 days after public trading commences on the Exchange.

DATED at Toronto this 15th day of January 1979.

### DECISIONS, ORDERS AND RULINGS

April 8, 1979

# IN THE MATTER OF OFFERS FOR SHARES OF HUDSON'S BAY COMPANY

On Sunday afternoon, April 8, the Commission convened an informal meeting to consider representations from representatives of the Thomson organization and George Weston Limited as to certain recent developments concerning the Weston's offer for shares of Hudson's Bay Company. Before turning to a review of the facts surrounding this meeting and of the conclusions that we draw from those facts, brief reference to the procedure involved is in order.

### PROCEDURE

The Securities Act (the 'OSA'') confers a variety of responsibilities on this Commission and provides a variety of types of authority to enable us to carry out these responsibilities. For this purpose, we can distinguish between responsibilities as to which we have the authority to make a dispositive ruling, and those as to which our authority is to make an application to the court for a determination. An example of the former type of authority would be an application under section 59 for an exemption from the prospectus filing requirements. An example of the latter type would be the initiation of an application to the court under section 143 for a compliance order. In proceedings of the former type, The Statutory Powers Procedure Act applies, with its provisions as to notice and procedures. In proceedings of the latter type, our decision to initiate an application to the court is not subject to that Act; we may consult with whom we wish and to the extent that we wish in making that decision.

During recent months, it has become apparent that the to and fro of offer and counter offer in a competitive take-over bid gives rise from time to time to questions as to the interpretation and application of the provisions of the OSA concerning take-over bids. Predictably, one party or the other then has recourse to the Commission, suggesting that we initiate an application for a compliance order under section 143; sometimes the applicant further suggests that the compliance order proceeding be accompanied by a cease trading order under section 144. We have found that these approaches raise questions of substantial difficulty in our administration of the OSA. On the one hand, we are reluctant to be unduly quick off the mark in our intervention in a competitive take-over bid. On the other hand, we have a clear responsibility to enforce the law and we cannot stand idly by and permit one party to obtain an improper advantage over another.

In the circumstances, we have evolved the practice of directing that complaints of this nature be reviewed initially with our staff. If the Director concludes that the complainant has made

a case that merits our consideration, he presents that case to us. If on the facts, it seems clear that the complaint is justified, we could immediately proceed to exercise our authority under section 143 or 144. More usually, we have found that the complaint involves a question of interpretation as to which we have been reluctant to take strong action without receiving the benefit of advice and guidance from the affected parties.

In these circumstances, the informal meeting procedure has been adopted. The representatives of affected parties are not under oath, but we receive representations as to fact within reasonable limits in addition to representations as to law. We have complete control of the proceedings, but endeavour to provide the parties with full opportunity to discuss the areas that we have previously identified as of concern to us. Since it is in the nature of competitive take-over bids that timing is essential, these hearings are usually convened on very short notice and this contributes further to their informality. For example, this meeting was called on Saturday afternoon and convened on Sunday afternoon.

One other preliminary point merits mention. This is the second informal meeting held in this competitive offer. Prior to the first informal meeting, the Director explained to each of the parties that the Chairman was formerly a partner in the law firm representing Thomson's. The partnership relationship has, of course, been severed. In our view, the consent of the parties to having the Chairman sit was unnecessary. However, in courtesy to the parties they were consulted and all indicated that they had no objection to the participation of the Chairman in that meeting. Nothing was said during this meeting which would indicate that there was any such objection.

The target company in this situation, the Bay, is subject to the Canada Business Corporations Act (the ''CBCA''). Accordingly, the take-over bid provisions of that Act are applicable. We therefore invited Mr. Fred Sparling, the Director under that Act, to attend the informal meeting and are pleased that he was able to do so.

### **FACTS**

The following sequence summarizes developments to Sunday, April 8. It should be noted that each of the offers referred to contains the standard condition that the offeror will not be obligated to take up any shares if, prior to the expiry date of the offer, the board of directors of the offeree company (i.e., the Bay) materially changes the undertakings, assets or capital of the offeree company:

(1) March 1, 1979 - announcement by The Woodbridge Company Limited and Thomson Equitable (International) Limited (collectively referred to in these reasons as the "Thomson organization") that they would make a cash offer, at \$31 per share for 51% of the outstanding shares of the Bay;

- (2) March 15 formal offer of Thomson's in circular form pursuant to the OSA and the CBCA, to terminate on April 6;
- (3) March 23 directors' circular by the board of the Bay recommending against acceptance of the Thomson offer and indicating that a fair value for the shares of the Bay would be in the range of \$37 to \$40;
- (4) March 26 announcement by Weston's that it was considering an offer for shares of the Bay;
- (5) March 28 announcement by Weston's of its intention to bid for 51% of the Bay at \$40 per share, payable at the election of the offeree in cash or in Series C preferred shares, subject to certain constraints on the minimum and maximum number of preferred shares that Weston's could become obligated to issue;
- (6) April 2 announcement by Thomson's that it had mailed on March 31 a formal amendment to its offer, increasing the cash offer price to \$35 per share, increasing the number of shares that it could become obligated to purchase to 60% of the outstanding shares of the Bay and most importantly for present purposes making its offer unconditional, so that it would become obligated to purchase any and all shares deposited up to 60% of those outstanding. Also, the offer was extended from April 6 to April 9 in compliance with the OSA requirement that a 7-day withdrawal period be made available where the terms of a take-over bid are varied before the expiration thereof;
- (7) April 3 in compliance with the procedure outlined above, an informal meeting was convened as a consequence of approaches made by Weston's to the Director alleging that the Thomson revision of April 2 constituted a new offer that should give rise to a 21-day offering period, rather than an amendment of the prior offer. After this informal meeting, and further discussions, an announcement was made that Thomson's would extend the expiry date of its offer from April 9 to April 12 and that Weston's would withdraw its allegations that the April 2 revision constituted a new offer rather than an amendment;
- (8) April 4 formal offer of Weston's in circular form pursuant to the OSA and the CBCA, to terminate on April 26 was mailed;
- (9) April 2 to 6 the Weston representatives stated that, during these days, concerns were expressed by owners of Bay shares arising from the fact that the Weston offer was conditional on 51% minimum acceptance and has an expiry date subsequent to that of the Thomson offer, an unconditional offer. According to the Weston representatives, these Bay shareholders

indicated that they would prefer the Weston offer, but that as a matter of business judgment, they might deposit their shares under the Thomson offer to guard against the possibility that sufficient shares might be acquired pursuant to the Thomson offer to preclude the 51% condition in the Weston offer from being satisfied. The amendment to the Weston offer described below was partly influenced by these concerns. In addition, discussions were held with institutions as to the possibility of an escrow arrangement that would meet the concerns more fully. We were told that these discussions were in a nascent stage on Thursday afternoon, April 5, when Weston's announced an amendment to their formal offer. Accordingly, no reference to the escrow arrangement was made in a press release issued at 4 o'clock p.m.; a brief reference indicating that "arrangements are under discussion . . . " was included in the formal amendment prepared and printed during the night of April 5 to 6;

- (10) April 6 Weston's formally amended its offer by offering to purchase up to 60% rather than 51% of the outstanding Bay shares and reducing the minimum acceptance from 51% to 45%. The formal amendment became available to Thomson's and the Commission in mid-afternoon; late in the afternoon, Thomson's approached the Commission alleging a number of contraventions of the OSA and the CBCA on the part of Weston's. On April 7, these allegations were considered by the Commission and we decided to convene an informal hearing limited to the specific allegations referred to below;
- (11) April 8 at the beginning of the informal meeting, we were provided with a copy of a press release from the Thomson organization stating that an amendment would be made to its offer so that it would be an offer for 75% of the outstanding shares of the Bay at a price of \$37, and without any condition as to the deposit of a minimum number of shares. The new expiry date will be April 17 at 5:00 p.m. local time.

The matters discussed at the informal meeting related principally to the escrow arrangement referred to under (9) above. We turn now to that arrangement and the allegations made by the Thomson representatives with respect to it.

### ESCROW ARRANGEMENTS AND THOMSON ALLEGATIONS CONCERNING THEM

To describe the allegations, it is necessary first to outline the content of the escrow arrangement. This document, which became available to Thomson's and the Commission during the informal meeting, provides for the deposit of Bay shares with The Canada Trust Company pursuant to a series of specific instructions. The salient features are that Canada Trust would be obligated to deposit shares held under the escrow arrangement

pursuant to the Thomson offer unless, just prior to expiry of the Thomson offer, the number of Bay shares held under escrow arrangements together with those then owned by Weston aggregates at least 45% of the outstanding shares, or such lesser percentage as Weston may then indicate is acceptable to it. Put another way, Canada Trust would deposit the escrowed shares under the Thomson offer unless satisfied that the minimum deposit required under the Weston offer would be either met or waived. If so satisfied, Canada Trust would hold the shares to tender under the Weston offer.

The escrow arrangement also provides that a shareholder depositing shares under it may demand re-delivery of those shares to him at any time up to the day preceding expiry of the Thomson offer. After expiry of the Thomson offer, the shares may be withdrawn only if, prior to April 18 (or the first subsequent day on which shares may be deposited under the Weston offer without right of withdrawal) a competing offer is made for more than 60% of the outstanding shares of the Bay at a price of \$40 per share or more, or for 60% or more of those shares at a price in excess of \$40 per share. For convenience, these rights are referred to below as the "withdrawal provisions".

A number of allegations were made by Thomson's based on the escrow arrangement. At the outset we will mention one of them, merely to dispose of it. The suggestion was that the omission of a reference to this agreement in the April 5 press release, and the cryptic references in the April 6 amending offer, were misleading and inadequate disclosure. The statements made by Weston's representatives satisfied us that we should not give weight to these allegations; further, it is difficult to see how Weston's would be advantaged by failure to describe the escrow arrangement in those documents. Even if we felt that this allegation had merit, it would be of questionable relevance to the matters in issue during this meeting, although it might become relevant in other proceedings.

The allegations that concerned us more were of two types, disclosure and substantive. Initially we were seriously concerned with disclosure implications of the escrow arrangement. It was apparent that Weston's agents have already begun an aggressive campaign to persuade institutional owners of the Bay shares to deposit their shares under the escrow arrangement. It was less clear to us that similar attention would be given to retail investors. However, during the informal meeting we were told by the Weston representatives of their plans for advertising the availability of the escrow arrangement and for making copies of it available to shareholders of the Bay across Canada and in the United Kingdom. We are satisfied that these proposals would, as a practical matter, provide retail investors as well as institutional investors with reasonable access to the escrow arrangement. Accordingly, we turn our attention to the substantive allegations.

While these overlap, they can be divided for analytical purposes into three:

- that the provision of the escrow arrangement constituted the attachment of a condition to the Weston offer, and that that condition was prohibited by 82.10 of the OSA;
- that the provision of the escrow arrangement constituted a new offer by Weston's which should give rise to a 21-day offering period;
- that the provision of the escrow arrangement constituted a variation of the terms of the Weston offer and should give rise to a 7-day withdrawal right under 82.3 of the OSA.

### DISCUSSION OF SUBSTANTIVE OBLIGATIONS

The Thomson representatives acknowledged that there would be no objection under the OSA or the CBCA if a group of holders of shares of the Bay elected to gather together and to enter into an arrangement modelled on the escrow arrangement. The gravamen of their complaint was that, when initiated by the offeror, the new provision was objectionable in principle and that it gives rise to the three concerns summarized above under the OSA and the CBCA. Weston representatives (supported by a helpful presentation by counsel for Canada Trust) contended that they were merely providing holders of Bay shares with a facility that it would have been perfectly permissible for them to arrange on their own.

There was much discussion as to whether the escrow arrangement was consistent with the language and with the policy objectives of the OSA and the CBCA. Thomson representatives maintained that the 21-day offering period is a key provision and contended that the availability of the escrow arrangement may (if the shares deposited under it are tendered pursuant to the Thomson offer) make the Weston offer moot and thereby preclude Bay shareholders from having 21 days within which to consider and accept the Weston offer. Representatives of Weston's, on the other hand, contended that the arrangement proposed was a voluntary one and that, given the interaction of the Thomson offer and the Weston offer, the escrow arrangement is the only available technique whereby shareholders of the Bay could be provided with a meaningful opportunity to take advantage of the alternative offers open to them.

In our deliberations subsequent to hearing representations, we were cognizant that the real difficulty is one of timing. There are several reasons why the statutory pattern provides a 7-day withdrawal right after the making or variation of an offer. One of them is to ensure that offerees have an opportunity to analyze the offer or varied offer and to seek informed guidance. Another is to provide a meaningful opportunity for a competing offer. If offeror A were to make an offer, offeror B were to make a counter offer within 7 days and offeror A were to reply expeditiously thereafter with an amended offer that included an escrow

arrangement of the type proposed here with an effective 7-day withdrawal right, we do not think that we would object. Shareholders of the target company would have 7 days after offeror A's amendment to withdraw their shares pursuant to 82.3. During those 7 days, the offerees could seek informed guidance on how they should react to the amendments and offeror B could disseminate material critical of the escrow arrangement. All of this would be in accordance, we feel, with the statutory pattern.

For these reasons, we are not prepared to attack the provision of the escrow arrangement either on the basis that it is a condition in contravention of 82.10 or on the basis that it is a new offer that should trigger a new 21-day offering period. (However, we reserve the possibility that the escrow arrangement might be considered a new offer on one interpretation discussed below.) This leaves us with the question of whether provision of the escrow arrangement is a variation of the terms of the Weston offer within the contemplation of 82.3. Here, the following considerations seem relevant:

- as a matter of contract law, the provisions of an offer relating to the procedures whereby it may be accepted seem to us clearly to be part of the terms of that offer. Accordingly, a change in those provisions or a variation of those provisions can properly be regarded as a variation of the terms of the offer;
- discussion during the informal meeting demonstrated that there are aspects of the escrow arrangement upon which Thomson representatives could meaningfully comment if the 7-day period contemplated by 82.3 were available for the purpose. For example, depositors under the escrow arrangement would not be protected against a withdrawal of the Weston offer consequent upon a material change in the undertakings, assets or capital of the Bay occurring after expiry of the Thomson offer and prior to expiry of the Weston offer. Nor would they have a withdrawal right if, for example, during the interval between expiry of the Thomson offer and expiry of the Weston offer another offeror were to bid for 100% of the shares of the Bay at \$39 per share - although such a bid might be preferable to the Weston offer. Representatives of Weston's explained that these would be matters that Bay shareholders would properly take into account in their decision whether to deposit their shares under the escrow arrangement. This may be true, but their decision might be a more informed one if Thomson's had a meaningful opportunity to publish a commentary on the escrow arrangement;
- 82.3 is not limited to a material variation. It applies, by its terms, to any variation. However, we might well be reluctant to take action to enforce the section as to an amendment of a purely technical or routine nature. This, in our view, is not that case. Provision of the escrow arrangement is a significant innovation by Weston's.

For all of these reasons, we have concluded that the provision of the escrow arrangement is a variation of the terms of the Weston offer triggering the application of a 7-day withdrawal right under section 82.3. On a narrow interpretation of that section, it might seem that the 7-day withdrawal right would be satisfied if made available for shares deposited under the Weston offer itself, as distinguished from the escrow arrangement. That interpretation could be satisfied readily by the Weston organization; as currently outstanding their offer provides for a withdrawal right until April 17, and no great hardship for them would be involved in the extension of that date by a few days. But that would not satisfy the intent of 82.3 in its application to those who deposit under the escrow arrangement, if their shares are deposited under the Thomson offer prior to expiry of the 7 days mandated by 82.3. Put another way, a withdrawal right of 7 days after a material variation is contemplated by 82.3, and that is not a meaningful right if the shares that are the subject of the right can be deposited under another offer during the 7 days. If this analysis does not support our conclusion that there must be a 7-day withdrawal right after provision of the escrow arrangement, we would be prepared to reconsider the arguments adduced as to whether provision of the escrow arrangement constitutes a new offer.

As applies in the situation that now exists, a free right of withdrawal under the escrow arrangement would be available until April 16. Our conclusion on this matter will be communicated to Weston's during the night of April 8-9. Conceivably, they may be able to publish the escrow arrangement on a basis that will comply with 82.3, applied as above described. In this connection, questions may arise as to what constitutes compliance with 82.3. Various civil remedies may flow from any contravention of the section, and we lack authority to provide an interpretation that would be binding in connection with such remedies. In any interpretation of the section that falls to us, we anticipate that we would regard section 92 of The Securities Act, 1978 as relevant. Applied to these facts, that section would require communication "by prepaid mail, by personal delivery or in such other manner as the Director may approve".

We have considered whether we would be prepared to acquiesce to a shortening of the 7-day period in the circumstances of this case, if Weston's are unable to comply with 82.3. Our conclusion is that we should not consent to a shortening even if section 90 of the OSA provides us with legal authority to do so - which is not clear. To acquiesce to a shortening would change the rules of the game while the game is in progress, something that we are reluctant to do. Further, we are aware that 82.3 has had a material impact on the planning of the Thomson organization, which has made no suggestion that we should modify the application of the section to the Thomson offer. To acquiesce to a shortening would, then, constitute a change in the rules and result in an uneven application of the rules.

We therefore put Weston's on notice that, if, either directly or through an agent, it proceeds with the addition of the escrow arrangement to its offer in a manner that does not comply with section 82.3 of the OSA, we will instruct our counsel immediately to initiate proceedings for a compliance order under section 143. On request from the Thomson organization, we would, in that situation, give consideration to the issuance of a cease trading order directed at trades in shares of the Bay with a view to their deposit under the escrow arrangement, pending disposition of the application for a compliance order.

We should add that all of us much appreciated the helpful submissions made to us by representatives of Thomson's, Weston's and Canada Trust. They were provided under considerable pressure and tight time limits and set a very high standard.

## BULLETIN

**OF** 

## ONTARIO SECURITIES COMMISSION

**FOR** 

May, 1979

Issued Monthly by the ONTARIO SECURITIES COMMISSION

10 WELLESLEY STREET EAST, TORONTO, ONTARIO M7A 2H7

## **EXPLANATORY NOTES**

Information contained in this report has been summarized from reports filed with the Commission.

The name of the issuer is followed by a brief description of the class of security the name of the person or company reporting and his or its relationship to the issuer. If a person has an indirect interest in the securities reported, e.g., through holding companies, affiliate companies, partnerships, trusts or other entities, this is shown. Symbols are used in the column "Transaction and Ownership Symbol" to indicate the nature of ownership i.e., direct or indirect. Similarly the character of transactions is indicated provided the transactions are other than a purchase or sale. (See guide to symbols below):

## **GUIDE TO SYMBOLS**

RELATIONSHIP	(appearing after the name reported)
"B"	—Beneficial Owner (direct or indirect) of equity shares of a corporation carrying more than 10% of the voting rights attached to all equity shares of the corporation outstanding.
"D"	—Director of principal company.
"DI"	—Director of a company which is an insider of the principal company.
"K"	Exercises control or direction (direct or indirect) of equity shares of a corporation carrying more than 10% of the voting rights attached to all equity shares of the corporation outstanding.
"S"	—Senior Officer of principal company.
"SI.,	-Senior Officer of a company which is an insider of the principal company.

## NATURE OF OWNERSHIP

No symbol — Securities are beneficially owned directly.

Symbol #1 —The reporting person or company beneficially owns and/or has control or direction over securities which are held by a company, associate, partnership, trust or other entity.

## CHARACTER OF TRANSACTION

No symbol	purchase or sale	"M"	internal transfer
"A"	—bequest or inheritance	"Q"	—qualifying share
"C"	-compensation	"R"	-redeemed (called, Matured)
"E"	-exchange or conversion	"Т"	-stock dividend
"F"	-exercise of rights, etc.	"V"	—stock split
"G"	—gift	"X"	-exercise of option
"IR"	initial report	"Z"	—distribution

<sup>\*</sup>Returned for reconciliation purposes.

## NOTICE

Resignation of David Johnston as a Commissioner and appointment of Stuart Thom, Q.C.

David L. Johnston, Dean of the Faculty of Law, University of Western Ontario, has resigned as a part-time member of the Ontario Securities Commission, effective May 31. His resignation is made necessary by his acceptance of the position of Principal of McGill University. Dean Johnston has been a member of the Commission since April, 1972 and has made a major contribution to the work of the Commission during that period. Apart from full participation in the weekly meetings and the hearings of the Commission, he has taken an active part in the preparation of reports that have had a significant impact on law and policy. His text, "Canadian Securities Regulation", is of great value to all who are affected by this area of the law. His colleagues in the Commission and the staff of the Commission regret Dean Johnston's departure, but wish him every success in his challenging and important new responsibilities.

Stuart Thom, Q.C. has been appointed to succeed Dean Johnston as a part-time commissioner, effective June 1. Mr. Thom has had a distinguished career as a solicitor in private practice in Toronto, and has long taken an active and responsible interest in the governing bodies of his profession. In consequence, he was Chairman of the Board of Governors of the Canadian Tax Foundation in 1960 and was elected as Treasurer of the Law Society of Upper Canada in 1974. His term as Treasurer ended in 1976, but he continues to hold responsible positions with the Law Society. The members and staff of the Commission look forward to becoming better acquainted with Mr. Thom during coming months, and are confident that he will make a significant contribution to the work of the Commission.

## DECISIONS, ORDERS AND RULINGS

## IN THE MATTER OF BRASCAN LIMITED

AND

IN THE MATTER OF EDPER EQUITIES LIMITED

Application: April 19, 1979 J.C. Baillie, Q.C., Chairman Present: H.S. Bray, Q.C., Vice-Chairman S.M.D. Beck, Commissioner R.T. Morgan, Commissioner G.C. McCartney, Commissioner W.A. Simonton, Commissioner E.S. Miles, Commissioner Laurence A. Pattillo ) for the Applicant J. Trevor Eyton, Q.C.) for Brascan Limited J.W. Garrow J.D.A. Jackson - a shareholder of James S. Bauer Brascan Limited C.R.B. Salter, Q.C. ) for the Ontario T.J. Lockwood ) Securities ) Commission staff T.A. Creet

This meeting was convened on short notice to consider the application of Edper Equities Limited ("Edper") made by letter dated April 18, 1979, pursuant to section 90 of The Securities Act, R.S.O. 1970, c. 426, as amended, (the "Act") for an order exempting a take-over bid proposed to be made by Edper for 11.7 million ordinary shares of Brascan Limited ("Brascan")

at \$28.00 from some of the requirements of the take-over bid Part IX of the Act. Edper, the holder of approximately 5% of the outstanding ordinary shares of Brascan, proposed to obtain sufficient additional shares to raise its holdings to 50%. substance, Edper asked to be granted an exemption from two specific restrictions in section 82 of the Act. Firstly, it wanted section 82.10 waived so that it would not be required to accept any of the securities tendered unless and until Brascan abandoned its current plans to make a take-over bid for F.W. Woolworth Company ("Woolworth"). This was styled the "Woolworth condition". Secondly, it asked to be relieved from the requirements of section 81.6 and be permitted to extend the time within which it would otherwise have been required to accept the shares tendered or return them, if all the conditions were not fulfilled and they were unwilling to waive them, for a period of up to a maximum of 120 days from the date of the offer in the hope that within that period the Woolworth condition would be satisfied by the termination of the Woolworth offer. It proposed that its offer would only be open for acceptance for the minimum of 21 days permitted for a partial bid by section 82.4. Under normal circumstances, section 81.6 would limit the time for taking up the stock or returning it to 35 days, that is for an additional 14 days after the offer closed.

The application was preceded by a series of events set out in their letter which commenced prior to, and continued through, the weekend of April 7-8 last. Edper, through its controlling shareholders, had acquired a 5% interest in Brascan. It first made overtures to Brascan's management on a no-name basis as to the possibility of a take-over. On April 5, 1979, Edpe: made direct contact with Brascan concerning this proposal. Edper confirmed the intention to Brascan in a letter dated April 6, advising both the Commission and the Toronto Stock Exchange of it on a confidential basis. On the morning of April 9, Edper publicly announced the proposal. Almost contemporaneously Brascan announced its proposal to make a cash tender offer for all of the outstanding common shares of Woolworth. (The two announcements appeared on the Dow Jones tape at

9:13 a.m. and 9:16 a.m.). On the same day, Brascan made preliminary filings with regulatory authorities in the United States. Brascan's move came as a surprise to Edper, Edper concluding in the application that the Woolworth purchase would be an "improvident investment" for Brascan. Edper has been seeking to persuade Brascan to abandon the Woolworth offer.

Edper proposed to make the take-over bid in general compliance with the requirements of Part IX of the Act but subject to the following specific conditions:-

- 1. It would not be obliged to purchase any shares unless at least 11.7 million ordinary shares were deposited within 21 days of its making the offer.
- While Edper reserved the right to purchase more than 11.7 million shares, if more were deposited, if Edper elected to purchase less than all of the shares deposited such shares would be taken up and paid for on a pro rata basis.
- 3. Edper would not be obliged to take up and pay for any shares tendered unless, prior to the expiration of 120 days after the date of the offer, Brascan or its subsidiaries had not acquired, were not obliged to acquire and were not, "in the sole opinion of Edper", proceeding to acquire shares of Woolworth.
- 4. Edper would not be obliged to take up and pay for any shares under the offer if Brascan took action subsequent to the date of the offer that would materially change the undertakings, assets or capital of Brascan; and
- 5. Edper would take up and pay for the shares which it became bound to

purchase within 14 days from the expiry of the offer or within 7 days from the date that the Woolworth condition is either satisfied or waived by Edper.

The application went on to note that Edper could waive conditions 1, 3 and 4 either in whole or in part.

During the course of argument, Edper's counsel undertook, on behalf of Edper, that it would not exercise its legal right to waive the Woolworth condition. Further, counsel offered to delete the words "in the sole opinion of Edper" from the Woolworth condition.

Mr. Pattillo suggested the criteria against which the Commission ought to consider a section 90 application in order to form an opinion that the order requested would not be prejudicial to the public interest. These are as follows:-

- (a) that the condition is of a type contemplated by the statute;
- (b) it is a specific, clear condition;
- (c) the condition is reasonable and relates to the offer being made; and
- (d) the shareholder is able to assess the offer and reach a decision as to whether to tender his shares under the offer.

The application centered on the extended time period and the Woolworth condition as set out in 3. Conditions 1, 2, 4 and 5 are all either required or permitted by section 82 of the Act. In simple terms, Edper stated that without the Woolworth condition, including the extended time, Edper would not proceed with the offer since the Woolworth acquisition made Brascan an unacceptable target for Edper. Edper submitted that shareholders should not be denied the

opportunity of accepting an offer at a "substantial premium over current market prices" that is \$28.00 versus approximately \$23.00 per share, that the conditions met the criteria suggested and were therefore not contrary to the public interest.

## The Proceedings

The Commission was advised by Edper on April 17 that Edper wished to make this application as a matter of urgency. The Commission's usual practice is to consider a section 90 application without public notice. This is because such applications have hitherto involved variations from the take-over bid rules that seemed clearly supportable in policy terms (use of United States procedures and materials where there are few target company shareholders resident in Ontario and many in the United States, or use during a postal strike of distribution procedures other than the mails) or for which clear lines of precedent were established (inclusion of a condition as to FIRA or CRTC approval and corresponding extension of time). It was not clear that the Edper application fell within either category and the Commission felt that an opportunity should be provided for representations to be made by other interested persons or organizations. While the law does not mandate a formal hearing on section 90 applications, Edper undertook to make a public announcement of the application in order that anyone who might wish to comment would have an opportunity to do so. While they may not have been legally entitled to do so (as to the status of Brascan as the target company, see Elsley's Frosted Food Limited v. Mid White Oak Square Limited (Ont. H.C. 1976) 14 O.R. (2d) 479), we were pleased to receive additional submissions from Brascan and from Mr. Bauer, a Brascan shareholder.

The Edper announcement was made about noon on April 18 and the meeting to consider the application was convened at 2:30 p.m. on April 19. We were therefore gratified at the response of those who attended both as to the careful preparation evidenced in such a limited time span and the forbearance in recognizing the urgent nature of the application to Edper. The

meeting proved to be well attended by interested persons. While only Brascan and Mr. Bauer, came forward to offer their views (in addition to Edper) each of them was fully heard and the representations collectively were of considerable value. Mr. Salter presented the staff position. The meeting concluded and the Commission retired with the announced intention of seeking to reach a conclusion and announce its decision at 9:00 a.m. the next morning. This we were able to do with the promise of these written reasons to follow.

While it is not the Commission's intention to change its procedure on applications of a relatively routine nature, where it appears that a substantive question of public policy is involved, the Commission will seek through the most expeditious means available to obtain the views of those who might wish the opportunity to present them.

## Comments of the Commission on April 20

The panel members were unanimously of the view that the application must be refused. The Chairman made a short statement on their behalf noting the Commission's intention to canvass the important questions raised about the take-over bid provisions of the Act through these reasons. He stated, in support of our conclusion, that the variations sought from the statutory pattern represented too substantial a change from those requirements to be accepted in the hurlyburly of a specific application. The legislative scheme is a fair one, carefully considered, and one which should be adhered to except where there is a clear reason for variation. Edper remains free to await the disposition of the Woolworth bid before making its offer. The Commission was reluctant to see the shareholders of Brascan confronted with a situation where they must decide, during the initial 21-day period, whether to escrow their stock for a period of up to 120 days in the hope of receiving a premium above the then existing market for at least some of their shares. To do so would preclude them from dealing with their shares during the period, including the acceptance of a

competing bid on the more favourable terms. The applicant, of course, submits that not to permit them to do so is to deny them access to the potential of a successful offer for control at this premium.

In this preliminary statement, the Chairman expressed a personal concern about the policy implications of section 82.10 of the present Act, even as extended by section 89(1)12 of The Securities Act, 1978 (Statutes of Ontario, 1978, c. 47, not yet proclaimed; the new "Act") which restricts the conditions that may be added by an offeror to a take-over bid without an exempting order from the Commission. However, in keeping with our approach in Re Cablecasting Limited (1978 O.S.C.B. 37), cited by the Director in his recommendation that the application be rejected, even if we were inclined to do so we are reluctant to fashion a new policy in the heat of a specific application.

## Background of Legislation

The genesis of Ontario's take-over bid legislation is found in the recommendations in Chapter 3 of the March, 1965, Report of the Attorney General's Committee on Securities Legislation in Ontario (known as the "Kimber Report"). This, North America's first take-over bid legislation, was implemented through The Securities Act, 1966. The subject was considered further in the February, 1970, Report of the Ontario Securities Commission on the Problems of Disclosure Raised for Investors by Business Combinations and Private Placements (the "Merger Study"). On the basis of the recommendations in the Study's Chapter VII, through the 1971 amendments to the Act (1971, c. 31), the offeror's ability to impose conditions was restricted in section 82.10. Section 90 was amended to permit the Commission to grant exemptions from these restrictions.

The Kimber Committee, in paragraph 3.07, stated that its "recommendations concerning the adoption of a mandatory statutory code pertaining to take-over bids are made on an analytical basis designed to protect the general public by averting potential abuses while impeding as little as possible the use of the take-over bid technique". The Report further explained its purpose in paragraph 3.10 stating:-

"The Committee has concluded that the primary objective of any recommendations for legislation with respect to the takeover bid transaction should be the protection of the bona fide interests of the shareholders of the offeree company. Shareholders should have made available to them, as a matter of law, sufficient up-to-date relevant information to enable them to come to a reasoned decision as to the desirability of accepting a bid for their shares. In arriving at its conclusions, however, the Committee attempted to ensure that its recommendations would not unduly impede potential bidders or put them in a commercially disadvantageous position vis-a-vis an entrenched and possibly hostile board of directors of an offeree company."

This attempted balance continues to be the objective. Having concluded that take-over bids have proper business purposes and ought not to be unnecessarily impeded, the balance the Committee sought to strike was between the offeror and the offerees with protection being sought for the latter. Paragraphs 7.23, 7.24 and 7.25 of the Merger Study discuss the problems raised to that point because of the unrestricted right of the offeror under the 1966 Act to impose conditions. While the result is not without its critics, the Study concluded in a perhaps too simplistic fashion that since the offeree is committed to sell his shares once they are tendered, after the withdrawal period has expired, the offeror ought similarly to be committed once the minimum number of shares he is willing to purchase have been submitted.

The present provisions of section 82.10 reflect the legislative acceptance of the Merger Study view. This was balanced by permitting the applications for exemptions to be made to the Commission rather than to the court.

The 1973 Report on Mergers, Amalgamations and Certain Related Matters by Ontario's Select Committee on Company Law (1973 Report) reviewed the existing take-over bid legislation in some detail. Chapter 15 discusses conditions in a take-over bid. While the Report expresses concern about the restrictive nature of section 82.10, its recommendations (reflected in section 89(1)12(b) of the new Act) centre on permitting conditions allowing the offeror to withdraw if there are changes in the target company. This is not our case.

## The Proposed Conditions

The Select Committee's recommendations in Chapter 14, "Defenses to a Take-over Bid", while of peculiar interest to the parties in the present case, concluded that an offeror ought to be permitted to condition his offer so that he would not be bound if there were changes in the affairs of the offeree company. (Section 89(1)12(b) of the new Act has been expanded from the present requirements to encompass the recommendations of the Select Committee.) During the April 19 meeting, nobody quarrelled with the proposition that the proposed offer by Brascan for Woolworth would result in a material change in Brascan which, had Edper already made its offer, would have entitled Edper to withdraw its offer. While relevant to the present application, it was not determinative of the application. In particular it lends no support to the requested 120 day deposit period.

In the preliminary statement, the Chairman had noted:-

"We have no reason to question the assurances we were given by Brascan representatives that this bid (the

Woolworth bid) reflected a carefully considered and responsible decision of the Brascan board. Its announcement may have been accelerated somewhat as a consequence of the Edper announcement, but that does not seem objectionable. Accordingly, we can treat as a hypothetical question how this application would be dealt with if we had been satisfied that the Woolworth bid was entirely provoked as a defensive reaction to Edper."

From the starting point that Edper does not want to be forced to take up the shares tendered if the Woolworth offer is successful or is continuing at the take-up date we were asked to consider extending the 35-day period, within which an offeror making a 21-day offer either must waive any unfulfilled conditions or return the stock, for a further 85 days (120 days from the date of the offer). also condition number 5.) Quite apart from the Woolworth condition, we were unanimous in refusing to permit this time extension. In light of the complex legal battle now joined in the United States between Brascan and the Woolworth interests, the actions by the Brascan board of directors on the one hand in pursuing the Woolworth bid and on the other hand in resisting the proposed Edper offer, Edper's request for added time is understandable though unacceptable.

The time parameters, that is the 21 day minimum and the 35 day maximum for partial bids, in the Ontario legislation have been the subject of little discussion. They reflect the recommendation in paragraph 3.15 of the Kimber Report. Phillip Anisman, in his Takeover Bid Legislation in Canada: A Comparative Analysis (1974, CCH Canadian Ltd.), commencing at page 67, discusses time periods and suggests, at page 79, that 35 days may be too short in the face of a hostile management offeree. He concludes that the statutory period might appropriately be extended to as long as 60 days.

A notable exception to the present 21-35 day rule has been the exemptions granted in those takeovers where the new controlling interest must be approved by some government regulatory agency such as the Canadian Radio and Television Commission or under the Foreign Investment Review Act. Through such section 90 applications, the Commission evolved a policy, now reflected in sections 89(1)12(c) and 14 of the new Act, permitting the offeror to condition his bid on obtaining the required governmental or regulatory approval. Recognizing the time necessary to obtain such approvals the offeror under the new Act is permitted up to an additional 90 days for a total of 125 days from the making of the offer within which he must take up and make payment for the securities. This provision, coupled with our current practice under section 90, no doubt influenced Edper in selecting the 120-day period.

Edper submitted that our prior decisions in such cases provided a relevant precedent for this application. In each case, they said, an outside body must be persuaded to take certain actions before the bid is completed. The conclusion they urged was the fact that such outside body happens to be the target company's board rather than a governmental agency is logically irrelevant to the merits. While the argument has some attraction at first impression, we were unable to accept this parallel on further analysis. There is a world of difference between the approval by a neutral regulatory agency and a forced withdrawal by the Brascan board from a course of action deliberately undertaken by Brascan as a major business decision.

The legislation achieves a reasonable balance between the interests of prospective offerors and offerees in not inhibiting tender offers. Offers can be pursued in the face of hostile management's opposition. The time periods do not preclude competing bids from developing. Continued competition among offerors is feasible. The offerees are free to withhold their shares until the last minute in the hope that a better bid will develop. This has been most apparent through the developments of the last six months. The Commission, in the various applications which have come before it, has been concerned not to unduly advantage or disadvantage any of the competing parties - either the offerors or

hostile management. The legislation is for the benefit of the shareholder-offeree. Any condition which restricts the information available to or the freedom of choice offered to the shareholder through the legislation must be shown, on balance, to be for the benefit of the offeree-shareholder else it would be contrary to the public interest declared through the legislation. The onus is thus on the applicant to demonstrate such a benefit.

Here the advantages in the proposed conditions lay clearly with Edper. As a shareholder and a proposed offeror they were displeased with the action of management in rejecting their proposed offer, on the one hand, and through the Woolworth offer proposing a profound change in Brascan's character which, in Edper's view, makes Brascan a less desirable target. As a shareholder, if they view the actions of management as improper or improvident, there are courses of action which can be considered. Brascan has given notice of a shareholders' meeting, since the hearing announcing that it is being adjourned from May until June (and perhaps even later). As noted previously, Edper is free to await the results of this meeting and the success or failure of the Woolworth offer. If they had been permitted to proceed with a 21-day offer, coupled with its criticism of management implicit in the language of the application, the number of shares tendered in that 21-day period would no doubt provide a strong base upon which they might conclude that they had substantial support in a proxy battle with existing management.

As noted previously, we have not found it necessary to rest our decision on the Woolworth condition. Had the Woolworth condition been the only request, even though it appears improbable that that condition would have been satisfied within the statutory period of 35 days, strong support for the offer might have provided encouragement for Edper to engage in the proxy battle which it publicly stated it would not do unless it were permitted to proceed with the offer subject to the conditions it requested. Such strong support would have provided an indication to management as to the enthusiasm of their shareholders for the Woolworth bid. We cannot forecast what the result of such a restricted application, without the time

extension, might have been. But it is a position which was open to argument and which we did not find necessary to determine because of the request for the 120-day extension.

The application was unique for its second suggested condition that the offer would be open for a minimum period, 21 days, the obligation to accept by waiving unfulfilled conditions being deferred for up to a further 3 1/2 months. Against the possible benefit, a premium of about \$5.00 a share for not less than 45% of the number of shares tendered, the shareholders tendering were to be asked to give up their right to freely dispose of their shares during the extended period. As stated previously, assuming a substantial number of shares were tendered, an effective competing bid could not be mounted. The secondary market would be less liquid and would trade with the added uncertainties of not knowing what conditions Edper might, in the end, be willing to waive. On all of these facts, such a condition is contrary to the interests of the shareholders and the investors generally and therefore contrary to public policy.

In announcing this decision, the Chairman expressed a general concern that the present rules might provoke offerors into making bids elsewhere than in Ontario. The spate of take-over bids in Canada of recent date has resulted in regulatory review of certain aspects both in Ontario, by the other provinces having similar legislation and, since a number of the offers have involved federal corporations, as appropriate by the Director, Canada Business Corporations Act, actively participating in or maintaining an interested watching brief in our proceedings. We are encouraged to hope that such a pattern of removal from the jurisdiction will not develop by the generous attempts of the management of publicly traded companies to comply with both the letter and spirit of the legislation to the end that the credibility of the Canadian capital market will not be eroded unnecessarily. We concur in the Chairman's personal views wherein he stated:-

"Concern has recently been expressed that some competitive take-over bid struggles have become too complicated, and hence unfair to the minority. My own feeling is that the competition has benefitted the minority and that we should take pride in the even-handedness with which minority shareholders have been treated during the recent spate of take-over bids in Canada. The limit on conditions may contribute to simplicity and comprehensibility of transactions, but that may not be sufficient justification for a restriction which may some times preclude an offeror from making what would otherwise be an advantageous offer."

In closing, it should be clear that this decision does not preclude applications requesting an added condition or, with some special reason, an extension of time. The public interest is declared through the legislation. Those wishing to modify those rules or conditions must demonstrate on balance a benefit to the offerees.

DATED at Toronto this 4 day of May, A.D. 1979.

### REGULATIONS

# REGULATION 310/79 AS TO EXEMPTION FROM TAKE-OVER RULES THROUGH A STOCK EXCHANGE OR OVER-THE-COUNTER MARKET

The following news release was issued on May 9, 1979:

The Ontario Cabinet has adopted a regulation narrowing the circumstances in which a take-over bid made to Ontario shareholders is exempted from the rules in Ontario's securities act that are designed to ensure equality of treatment among shareholders. The Act exempts a bid made on an exchange or over-the-counter market. The regulation states, in effect, that this exemption is available only if the exchange or over-the-counter market has rules that provide protections of fairness and equality of treatment equivalent to those in that Act. The effect of the regulation is to bring into force immediately the narrower exemption under The Securities Act, 1978, which will come into force upon proclamation. This new Act was passed by the Legislative Assembly last year but is not yet law.

The theory of the exemption in the present Act is that the open nature of the exchange and over-the-counter markets would operate to ensure fairness and equality of treatment. Experience has demonstrated that this theory is not always correct. In consequence, The Securities Act, 1978 will limit the exemptions to stock exchanges "recognized by the Commission". The intent is that the Commission will recognize only exchanges whose rules provide equivalent protections to that afforded under the Act. The Toronto Stock Exchange and other Canadian exchanges have such rules.

Another reason for the regulation is that the provisions of United States federal law regulating take-over bids may be of limited application to bids effected in that country for certain Canadian companies whose shares are traded there. Certain provisions of that legislation apply only to bids for shares of target companies that are registered with the Securities and Exchange Commission. Some Canadian companies whose shares are traded in the United States, such as Brascan Limited, are not registered with the SEC. The Ontario Securities Commission believes that the requirements of one country or the other should apply to such bids. The Commission will continue its existing policy of expeditiously granting exemptions from Ontario's requirements for bids made in compliance with United States federal law where the target company is SEC-registered and has comparatively few shareholders in Ontario.

A copy of the new regulation is attached.

O.R. 310/79

# REGULATION TO AMEND REGULATION 794 OF REVISED REGULATIONS OF ONTARIO, 1970 MADE UNDER THE SECURITIES ACT

1. Regulation 794 of Revised Regulations of Ontario, 1970 is amended by adding thereto the following Part:

#### PART XIII

Trading Procedures on Take-Over Bids

- 90.-(1) An offer to purchase equity shares of a company effected through the facilities of a stock exchange not recognized by the Commission or in the over-the-counter market which but for subclause ii of clause b of section 81 of the Act would be a take-over bid in Ontario is not an exempt offer unless the offer,
  - (a) is made pursuant to appropriate rules; or
  - (b) if accepted, would be a normal course purchase.
  - (2) In this section,
    - (a) "appropriate rules" means,
      - (i) the by-laws of The Toronto Stock Exchange, or
      - (ii) the rules of any other stock exchange or over-the-counter market that require,
        - a. advance dissemination of relevant information concerning the offer and the person or company making the offer,

- b. a reasonable opportunity for shareholders willing to accept the offer to indicate such willingness, and
- c. a procedure for pro-rata participation where the number of equity shares made available by share-holders willing to accept the offer exceeds the number that the person or company making the offer is bound and willing to take up and pay for;
- "normal course purchase" means (b) a purchase or purchases made through the facilities of a stock exchange or over-the-counter market of such number of equity shares of a company that, together with all previous purchases of such equity shares made by the same purchaser during the preceding thirty days, does not aggregate 5 per cent of the equity shares of such company outstanding at the time such purchase or purchases are made, but previous purchases made in compliance with appropriate rules shall not be included.

### **APRIL 1979**

# REGISTRATIONS

## SECURITIES DEALER

Mastercraft Investments Corporation,
1206 Bank Street, (Restricted)
Ottawa, Ontario.
KlS 3Yl.
(effective April 2, 1979) New
Registration

# EXEMPT PURCHASER

Continental Illinois (Canada) Ltd.,
Suite 2400,
Commerce Court North,
Toronto, Ontario.
M5L 1H7.
(effective April 3, 1979) New
Recognition

# TERMINATIONS
